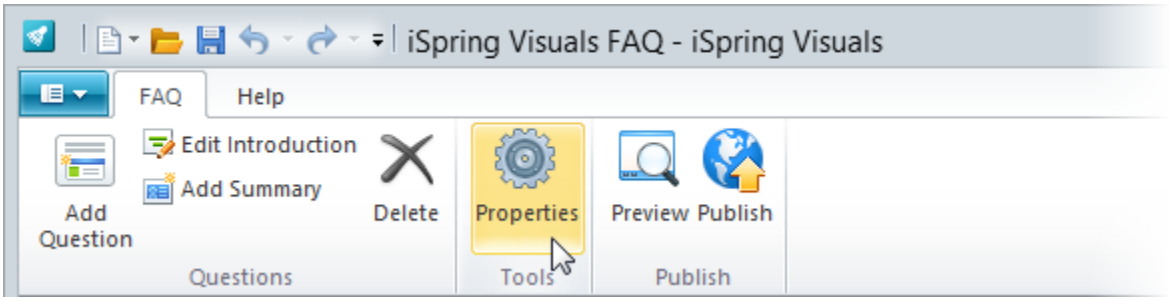
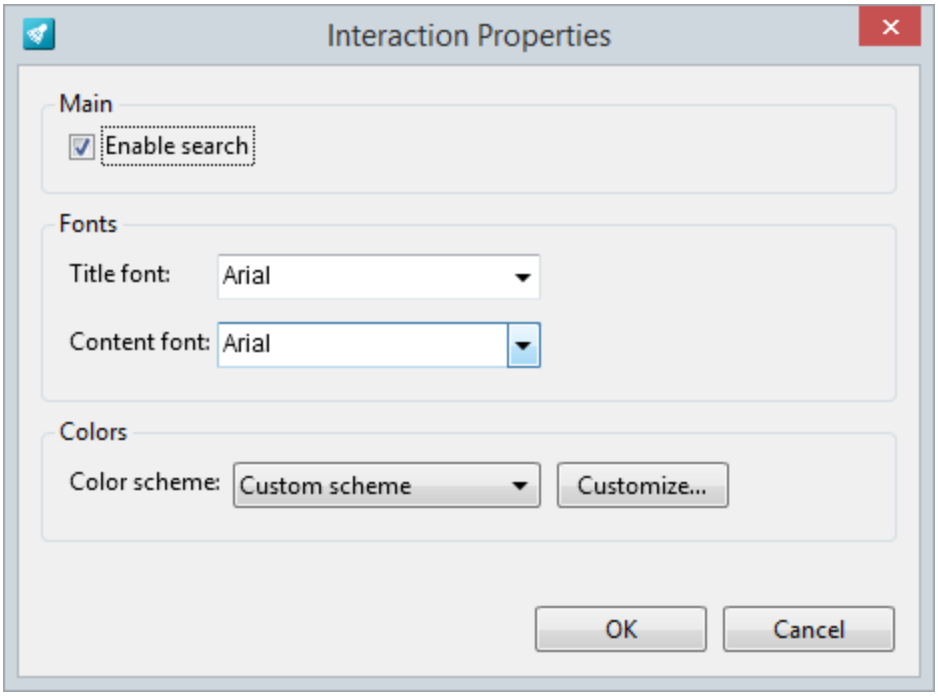
FAQ Properties

To modify FAQ properties, click the **Properties** button on the toolbar.



FAQ properties will open in a new window. Here you can change the default fonts of your FAQ interaction.



Main Properties

Property	Description
Enable search	Set this checkbox to add a search field to your FAQ interaction.

Fonts

Property	Description
Title font	Choose a font for the directory title.
Content font	Choose a default font to be used for text in your directory. When you change the default font, the program will ask if you want to apply the change to the content. You can always change this font for selected text using the drop-down font menu on the toolbar.

Colors

Choose one of the predefined color themes or click the **Customize** button and fine-tune the colors manually.
