

Download Content

To download a file or a folder from your iSpring Cloud repository:

1. Select a file or a folder in the **Content List**
2. Click **Download** in the title menu
or
Right-click a file or a folder and choose **Download** in the contextual menu.
The selected content item will be processed to download.
3. Then, you will be prompted to select the action that your web browser should take: **Open** or **Save**
4. Choose **Save** to download the selected file to your computer.

Additionally, you can restrict your viewers from downloading shared content. Please check the article [Share and Download Settings](#) to get more information.
