

Publishing to YouTube

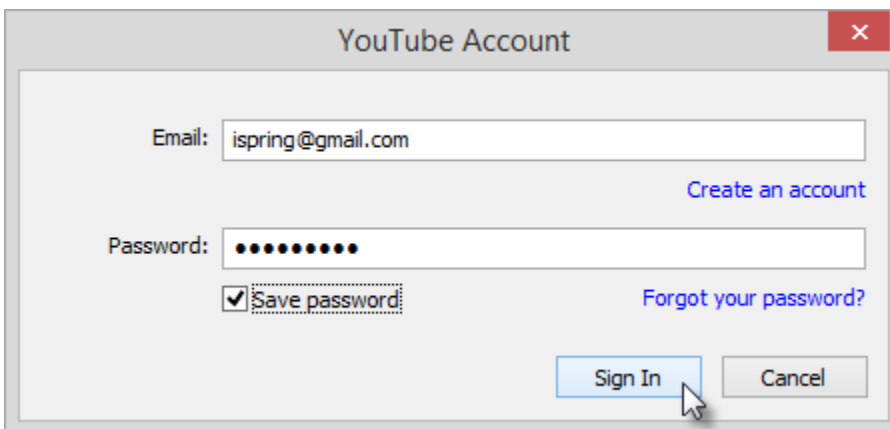

With the **Publish to YouTube** option, you can put your PowerPoint presentations on YouTube right from the iSpring publishing window. No need to save a video to your computer: just sign in to your account right there and click Publish.

The image shows the 'Publish Presentation' window in iSpring Suite. The window has a title bar with the iSpring Suite logo and a close button. On the left is a sidebar with icons for 'Web', 'CD', 'iSpring Cloud', 'iSpring Learn', 'LMS', and 'Video'. The 'Web' option is selected. The main area has two tabs: 'General' and 'Compression'. The 'General' tab is active, showing fields for 'Destination' (set to 'YouTube'), 'Account' (with a 'Sign In' link), 'Video profile' (set to 'High Definition 1080p' with a 'Configure...' button), 'Video Information' (including 'Title' set to 'iSpring Suite 7 Overview', a 'Description' text area, 'Category' set to 'Education', and 'Permission' set to 'Public (anyone can search and view)'), 'Slide Range' (with 'All slides' selected), and 'Playback Options' (with 'Seconds to spend on each slide' set to '5.0'). At the bottom are 'Import/Export', 'Publish', and 'Cancel' buttons.

See the step-by-step instructions for uploading a video presentation to YouTube below:

1. Choose **YouTube** in the Destination field
2. Click **Sign In** in the Account field. You will see a window where you can enter your YouTube account details or create a new account.

The image shows the 'YouTube Account' window. It has a title bar with the text 'YouTube Account' and a close button. The window contains an 'Email' field with 'ispring@gmail.com', a 'Create an account' link, a 'Password' field with masked characters, a 'Save password' checkbox (checked), a 'Forgot your password?' link, a 'Sign In' button, and a 'Cancel' button. A mouse cursor is pointing at the 'Sign In' button.

- Enter the Email address and pass that you usually sign in with. Select the 'Save password' checkbox if you want the program to remember your login information.
or
 - Click **Create an account** if you don't have a YouTube account. Sign up for a YouTube account and create your personal channel. Please read the article [Create an account on YouTube](#).
3. Click **Sign In**. When you enter your account details, iSpring validates this data, and you will see your YouTube account info in the **Account** field.
 4. Select a **video profile** depending on the device type

The screenshot shows a 'Video profile' dropdown menu with the following options: High Definition 1080p (selected), High Definition 1080p, High Definition 720p, High Quality 480p, Standard Quality 360p, Low Quality 240p, and Custom. To the right of the dropdown is a 'Configure...' button. Below the dropdown are input fields for 'Title:' and 'Description:'.

5. Change **Video Information**: title, description, category
6. Choose viewing **permissions** for a video file: public, private, and unlisted

The screenshot shows a 'Permission' dropdown menu with the following options: Public (anyone can search and view) (selected), Public (anyone can search and view), Private (only specific YouTube users can view), and Unlisted (can only be accessed by direct link). Below the dropdown is a 'Slide Range' input field.

7. Specify the time to spend on a slide in the **Playback Options**

If you selected individual slide timings and set the automatic playback of the animation effects for your PowerPoint presentation, these settings will be preserved in the resulting video file. You can select different timing properties for each particular slide in PowerPoint. It's recommended to use the following settings if your presentation contains animations and transitional effects:

- a. Change the start option for each animation effect on the Animations tab: choose 'Start With Previous' and 'Start After Previous'
- b. Set the Duration and Delay options of each effect (if necessary)
- c. Select the 'On Mouse Click' check box on the Transitions tab to advance the slide when you click the mouse

8. Click **Publish** to convert your presentation to a video file and upload it to YouTube.

Pay attention to the recommendations list that you'll see in the pop up window after you click Publish.

The screenshot shows a 'Recommendations' pop-up window with a close button (X) in the top right corner. The window contains an information icon (i in a circle) and the following text: 'For best results, please do the following: 1) Close any open programs to provide higher performance. 2) Stop audio playback in other programs, otherwise it will be recorded in the video. 3) Don't use PowerPoint until the publishing process is finished. Publishing process may take a while depending on PowerPoint presentation duration and complexity, your computer performance etc. During the conversion you may hear embedded audio. Click OK to start publishing.' At the bottom, there is a checkbox labeled 'Don't remind me again' and an 'OK' button.

Once publishing is finished, the video processing window will automatically pop up. Next, you can go to your video channel, and manage your video in the Video Manager of your YouTube account.
