

Hiding Slides

You can mark any slide as hidden by clicking the **Hide Slide** button on the toolbar or double clicking its thumbnail.

Hidden slides are not displayed in the outline of the player. They are skipped during presentation playback. Please note that hidden slides still exist in your presentation and can be accessed using hyperlinks or action buttons on the other slides.

The screenshot shows the 'Presentation Explorer' window. The toolbar includes buttons for 'Save & Close', 'Hide Slide', 'Promote Demote', 'On-Click Auto', 'Branching Lock', and dropdowns for 'Presenter' (Geoseffe Tembor) and 'Layout' (No Change). The main area is a table with columns: #, Title, Advance, Branching, Lock, Presenter, Layout, and Object.

#	Title	Advance	Branching	Lock	Presenter	Layout	Object
1	[Thumbnail]	[Icons]	5.0s	Default	[None]	No Change	+ Quiz + Interaction
2	hidden [Thumbnail]	[Icons]	6.5s	Default	Geoseffe T...	No Change	+ Quiz + Interaction
3	[Thumbnail]	[Icons]	7.3s	Default	Geoseffe T...	No Change	+ Quiz + Interaction

Annotations:

- Click 'Hide Slide' to hide/show the selected slides (points to the 'Hide Slide' button).
- Double-click a slide thumbnail to hide/show a slide (points to slide 2's thumbnail).
