# Narration Editor

Narration Editor is a convenient tool to synchronize your presentation with an imported or recorded video and audio.

To open the Narration Editor:

- Click the **Manage Narration** button on the toolbar.

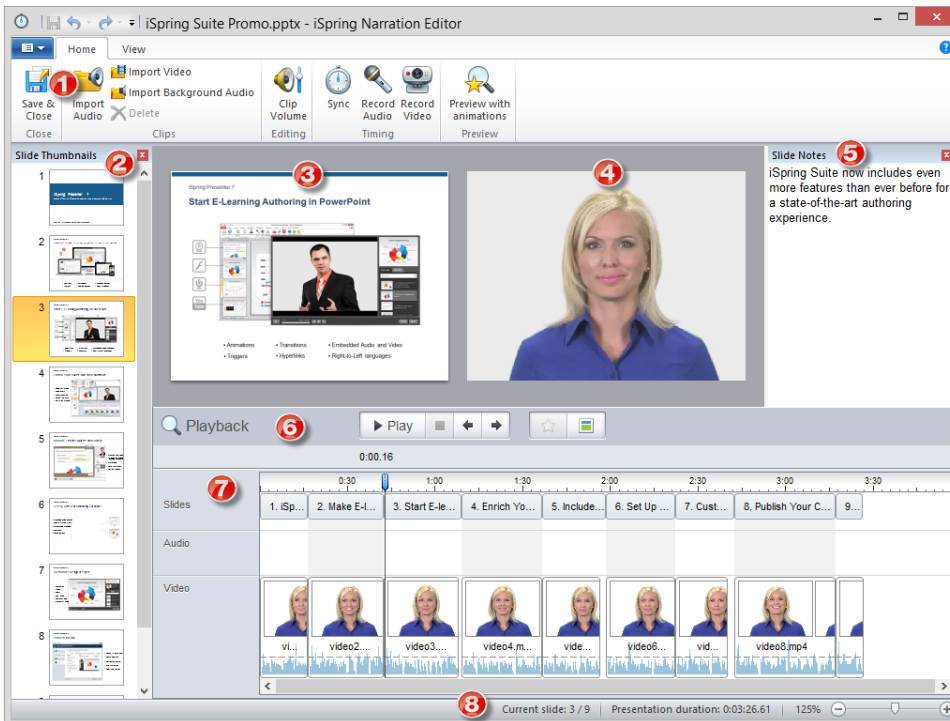

- The Narration Editor window will open.

Table 1. Narration Editor

Area	Description
1	The toolbar gives access to most functions of Media Editor.
2	This pane shows the list of slides in your presentation.
3	This is where the current slide is shown.
4	This pane will play video when you preview your presentation or display the current video frame.
5	This pane shows presentation notes. If you edit your notes here, they will be updated in your presentation after you click Save and Close.
6	This pane contains buttons to control presentation playback.
7	This is the main part of the narration editor, where you can sync video and audio clips with your slides.
8	The status bar contains info on the total number of slides, presentation duration and zoom pane.
