Importing audio across slides

To import audio files across slides:

1. Click the **Import Audio** button to launch the Import Audio Clips window.

2. Navigate to the desired audio file, select it.
3. Choose where you want to insert the audio clip:
    - In the beginning of the current slide
    - At cursor position
    - After existing clips

4. Click **Open** to import the file
   or
   click **Cancel** to exit without importing the file.

The selected clip will be added to the timeline.
