

Custom Feedback

Default feedback messages can be specified in [Quiz Properties](#). However, it's possible to set a custom feedback message for every question.

To enable custom feedback messages:

1. In the **Questions** pane, select a question you want to apply custom feedback to.
2. In the **Feedback and Branching** tab, choose the feedback type: **None**, **By Question**, **By Answer**
3. Edit the feedback text in the corresponding field for the entire question or click the **Edit Feedback** button next to a feedback message.

For the following question categories: Multiple Choice, Yes/No, and Pick One, you can select the **By Answer** option and add a custom feedback for a particular answer.

The screenshot shows the 'Feedback and Branching' tab. The 'Feedback' dropdown is set to 'By Question'. The 'Branching' dropdown is set to 'Disabled'. There are three rows for feedback: 'Correct' with the text 'Correct', 'Incorrect' with the text 'Incorrect', and 'Partial' with the text 'Partially correct'. Each row has an 'Edit Feedback' button and a three-dot menu button. To the right of each row is a 'Next question' dropdown menu.

Next, you can edit the message in the popup window. This way, you can add detailed feedback messages. Moreover, you can customize font, size, style and color of your feedback messages; add hyperlinks, bullets and indents.

The 'Question Feedback' popup window is shown. It has a title bar with a checkmark icon and a close button. The main area contains a text editor with a toolbar showing font (Arial), size (24), bold (B), italic (I), underline (U), text color (A), background color, bulleted list, numbered list, and link icons. The text 'Well done!' is entered in the editor. At the bottom are 'OK' and 'Cancel' buttons.
