Importing video across slides

To import video files across slides:

1. Click the **Import Video** button to launch the Import Video Clips window.

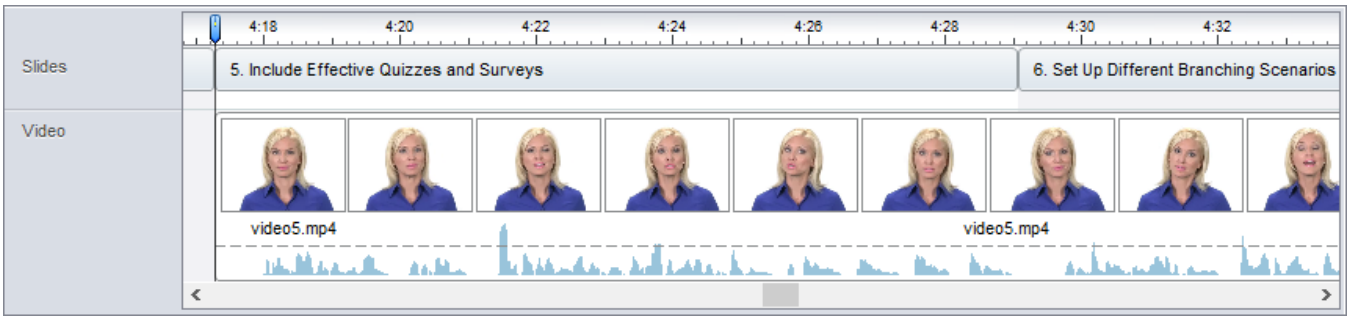

2. Navigate to the desired video file, select it.
3. Choose where you want to insert the video clip:
   - In the beginning of the current slide
   - At cursor position
   - After existing clips

4. lick **Open** to import the file
   or
   click **Cancel** to exit without importing the file.

The selected clip will be added to the timeline.
