

iSpring Suite 8 Guide

iSpring Suite is a Microsoft PowerPoint add-in that can be used to create great e-Learning courses with audio and video narrations, quizzes, interactions, dialog simulations, screen recordings and many more converted in the combined Flash & HTML5 format.

Check out this getting started video to learn more about the new features of iSpring Suite 8.

iSpring Suite produces high-quality Flash and HTML5 content that preserves every aspect of your initial PowerPoint presentation, even the new features of PowerPoint 2013 and trigger animations. It converts animations and transition effects, images and videos.

You can read about the [HyperPoint™](#) and [AccuPoint™](#) technologies that makes it all possible on our web site.
