Preview a Presentation

When you want to see how well your narrations are synced with your presentation, you will need a full preview of your presentation with all animations and transitions.

To preview a presentation with all transitions and animations enabled:

- Click the **Preview with animations** button on the toolbar.

Narration Editor will open the Preview panel, and your presentation will start playing from the beginning of the selected slide.

The **Start Preview** button will be replaced with **Next Slide/Next Animation/Skip Transition** buttons depending on the coming element in your presentation.

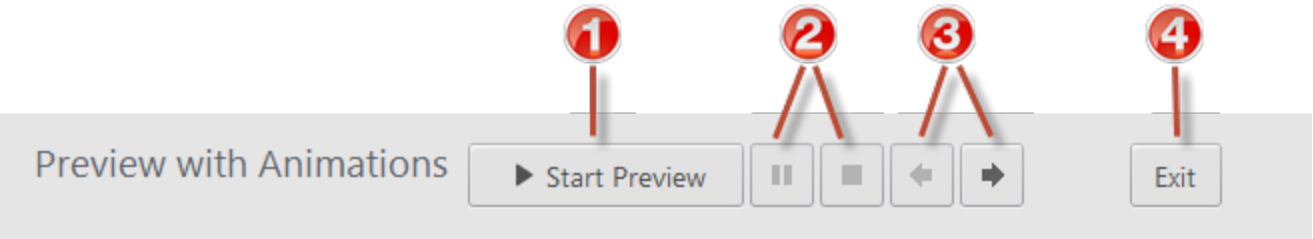

Table 1. Preview Panel Options

Option	Description
1	Click this button to start/stop the presentation preview, skip transition.
2	Use these buttons to control presentation playback (pause, stop).
3	Use these buttons to jump to the next/previous slides.
4	Click this button to quit the Preview mode.

If you stopped previewing a presentation, you can do the following on the timeline without leaving the Preview mode:

- Adjust slide duration
- Change animation start position
- Add and move audio and video clips.
