

Changing a Quiz Type

You can convert a graded quiz to a survey, if you haven't added graded questions to it yet. And it's always possible to convert a survey to a graded quiz. To change a quiz type:

1. On the product toolbar, click the **Properties** button.

The screenshot shows the 'Quiz Properties' dialog box. At the top, there is a 'Quiz type:' section with two radio buttons: 'Graded' (which is selected) and 'Survey'. Below this, on the left, is a sidebar with four categories: 'Main' (highlighted in orange), 'Navigation', 'Question Defaults', and 'Result'. The main area of the dialog is divided into two sections. The 'Main Properties' section contains a 'Quiz title:' text field with the value 'Olympic Games Quiz', a 'Quiz size:' dropdown menu set to 'Default 4:3', and two input fields for dimensions: '720' and '540', followed by the text 'pixels'. The 'Passing Score' section contains a 'Passing score:' label, an input field with the value '75', and a dropdown menu set to '%'. A red circle highlights the 'Quiz type:' radio buttons.

2. Change the quiz type using the corresponding radio buttons: **Graded** and **Survey**.
3. Click **OK** to apply the changes.
