

Randomizing Question Groups

The final quiz can include all question groups or a certain number of randomly sorted groups.

To set randomizing:

1. Go to **Quiz Properties -> Navigation -> Question Pool**
2. Select between two options:
 - Include all groups from the quiz
 - Select random groups

The screenshot shows the 'Quiz Properties' dialog box with the 'Navigation' tab selected. The 'Question Pool' section is highlighted with a red rounded rectangle. In this section, the 'Include all groups from the quiz' option is selected with a radio button. Other options include 'Select random groups' (unselected), 'Shuffle questions from the selected groups' (unchecked), and a dropdown menu showing 'All' out of 1. The 'Navigation' section above it has 'Submit one question at a time' selected, 'Allow user to postpone questions' checked, and 'Submit all at once' unselected. The 'Preset' dropdown is set to 'Linear / Branched Scenario'.

| Option | Description |
|---|--|
| <input checked="" type="radio"/> Include all groups from the quiz | Include all groups from the quiz |
| <input type="radio"/> Select random groups: All out of 1 | Select random groups: All out of 1 |
| <input type="checkbox"/> Shuffle questions from the selected groups | Shuffle questions from the selected groups |

| | |
|---|---|
| Include all groups from the quiz | All groups in the list of questions will be presented to the quiz taker in the fixed order. |
| Select random groups | A specified number of groups will be presented to the quiz taker in the random order. |
| Shuffle questions from the selected groups | Questions from the selected groups will be shuffled. |
