

# Layout and Design

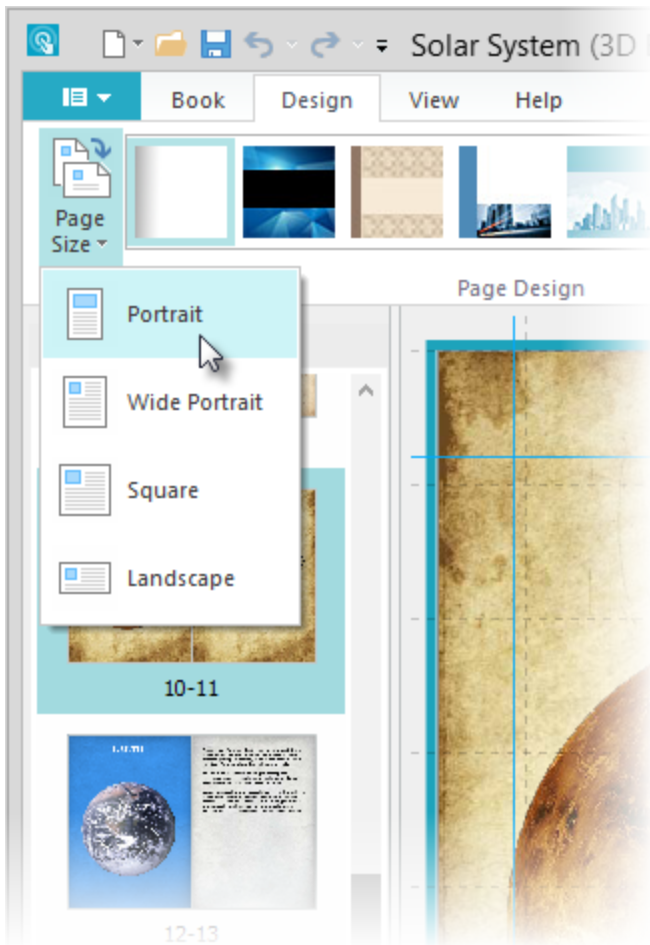

A new book will always be created using the standard portrait layout. But you can always change the size of pages in your book.

- [Changing Page Size](#)
- [Applying Custom Background to Pages](#)
- [Filling Page with Color](#)

## Changing Page Size

Choose one of the predefined page sizes from the **Page Size** drop-down menu:

- **Portrait**
- **Wide Portrait**
- **Square**
- **Landscape**

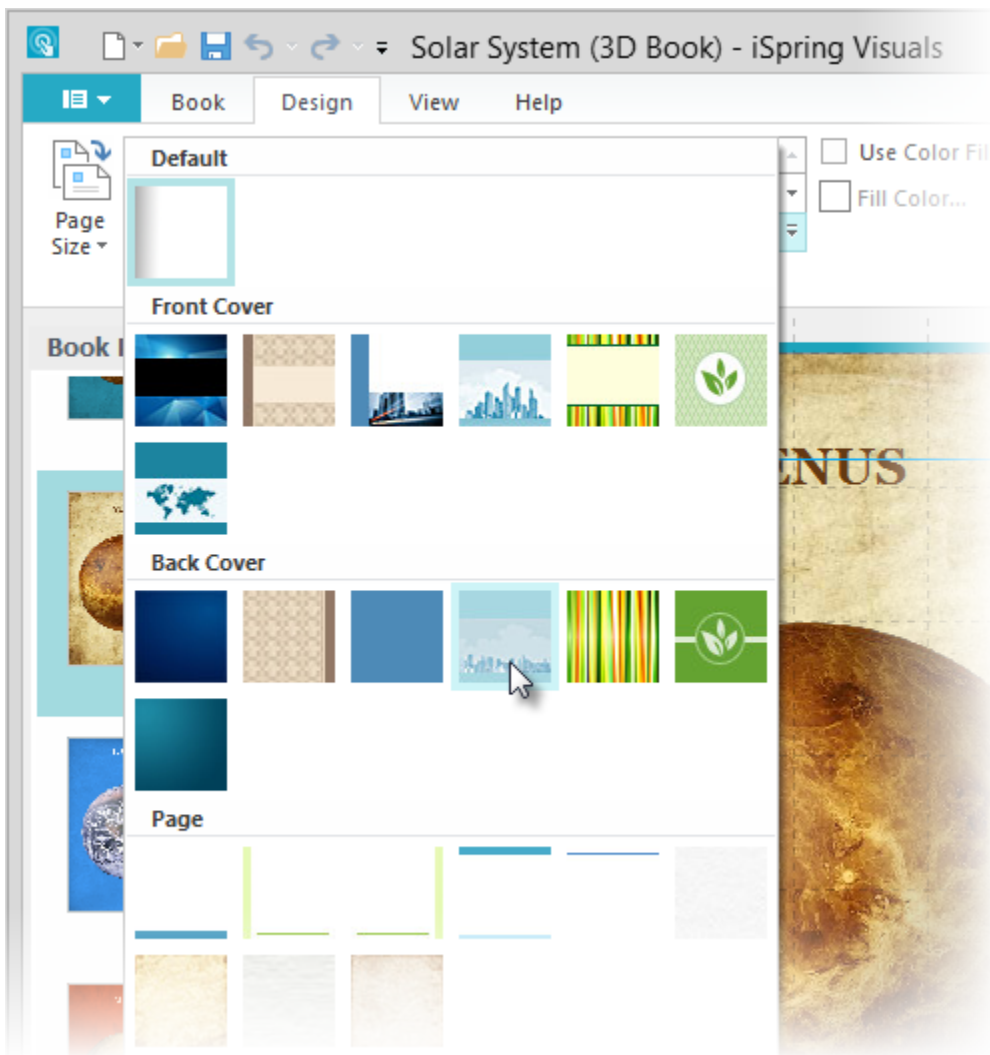

This will change the size of all pages in your book.

You can also customize the look of pages in your book. Each page can be customized separately.

## Applying Custom Background to Pages

You can also customize the look of pages in your book. Each page can be customized separately. Click a page to select it.

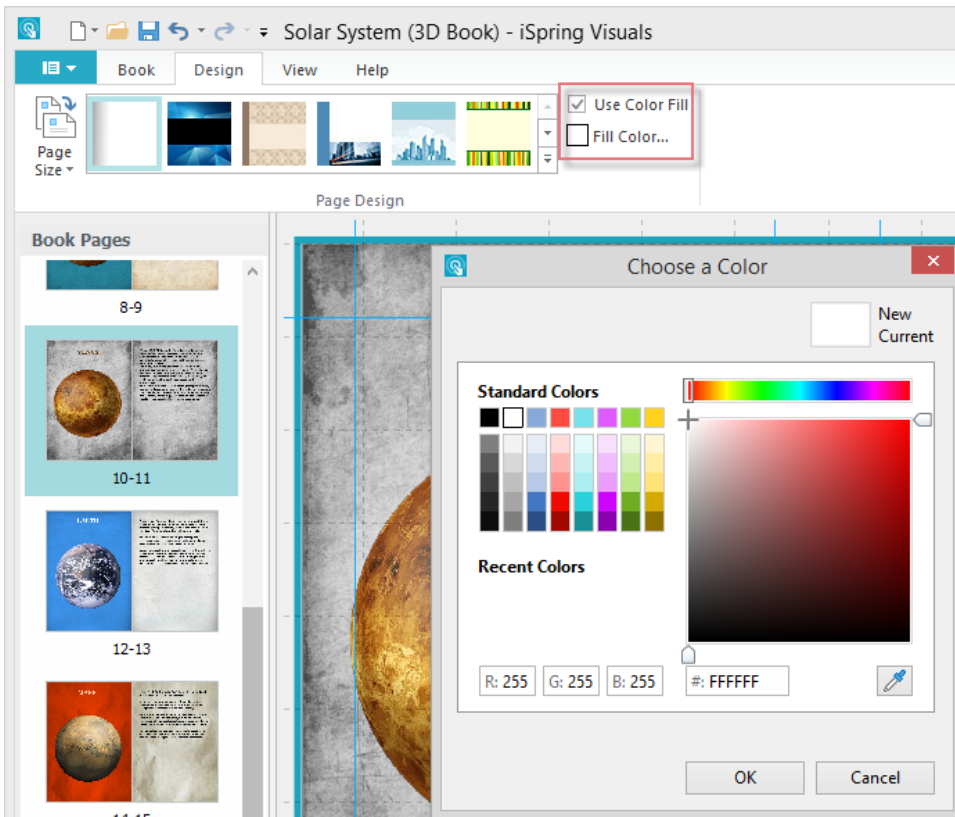

1. Click the **Page Backgrounds** button on the toolbar.
2. Choose a background from the drop-down menu.

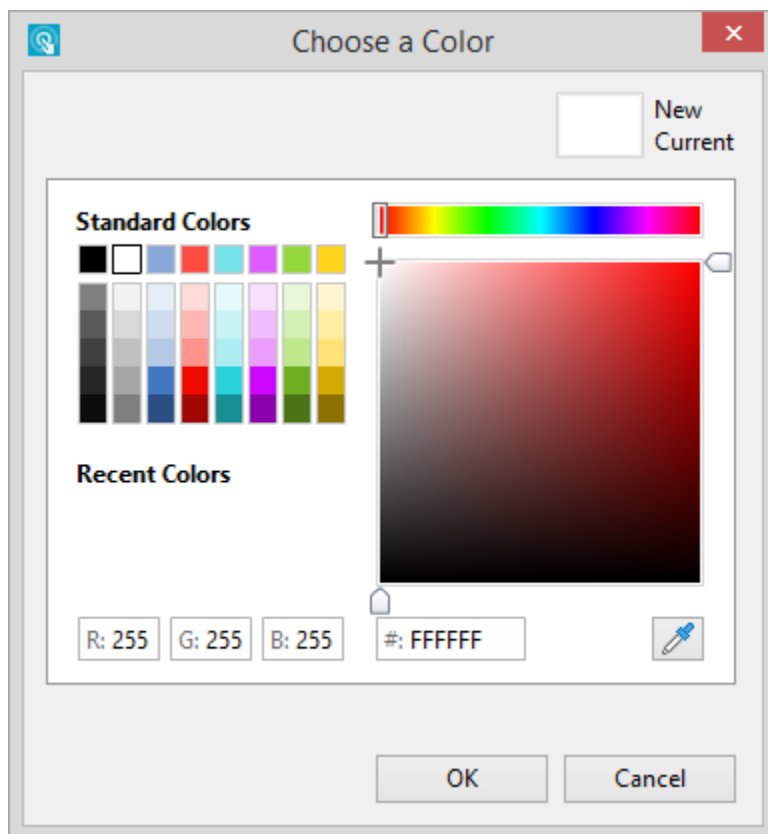

It's also possible to apply color to page backgrounds. If you already added a picture background, the fill color will change the tint of the applied image.

## Filling Page with Color

1. Click a page to select it.
2. Select the **Use Color Fill** checkbox.
3. Click the **Fill Color** button.

4. Choose a color in the color picker window.  
You can specify a color by typing its RGB values in the corresponding edit fields. It's also possible to type the hexadecimal color value.

Note: The specified color will be automatically applied to the selected page for preview.

5. Click **OK** to apply the color  
or  
Click **Cancel** to discard the color.
