

Adding Custom Backgrounds

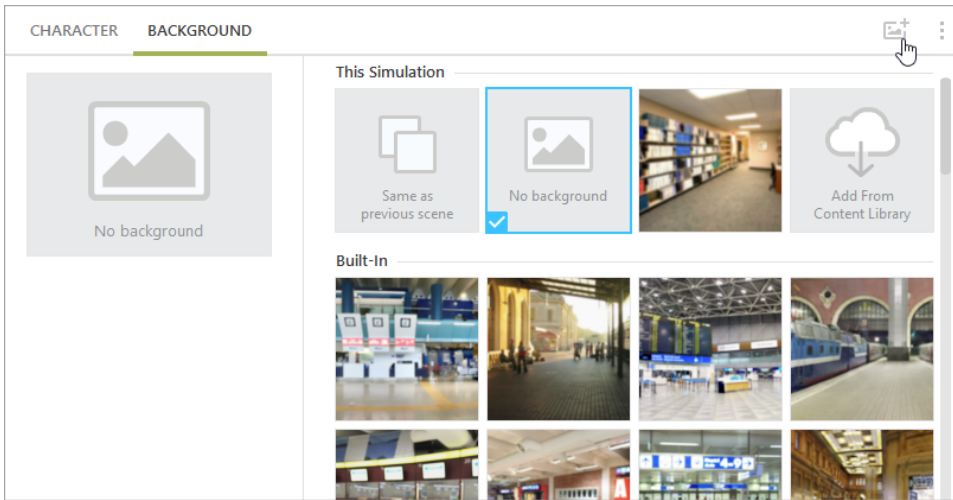

iSpring TalkMaster 8.1 now allows you to add your own backgrounds to put the learner in a familiar environment.

- [Adding a Custom Background](#)
- [Changing a Background](#)
- [Exporting a Background](#)
- [Deleting a Background](#)

Adding a Custom Background

To add your own background:

1. Open the Background Library.
2. Click **Add Background** and choose a background picture in the Open dialog.

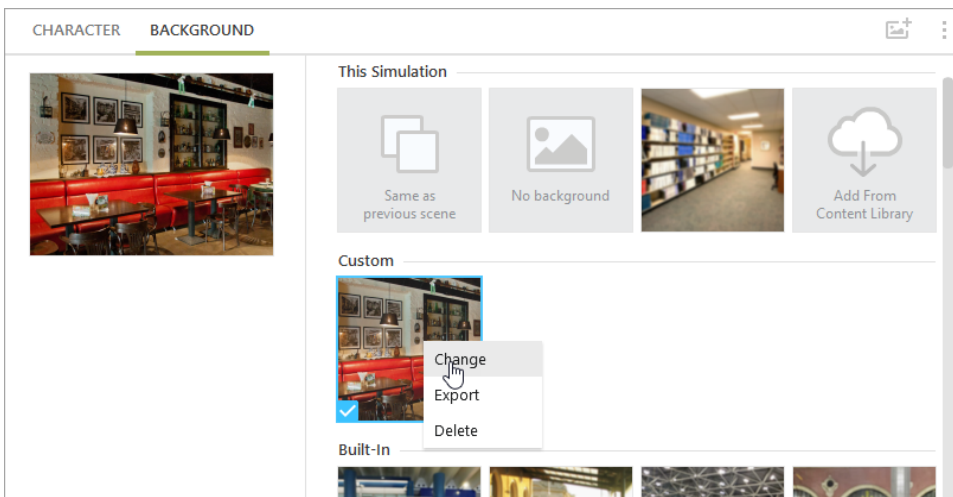

The new background will appear in the **Custom** area of the Background Library. You can replace it with a new picture, export it or delete.

Changing a Background

To change a background:

1. Right-click the thumbnail of the background in the Custom area and choose **Change** in the context menu.

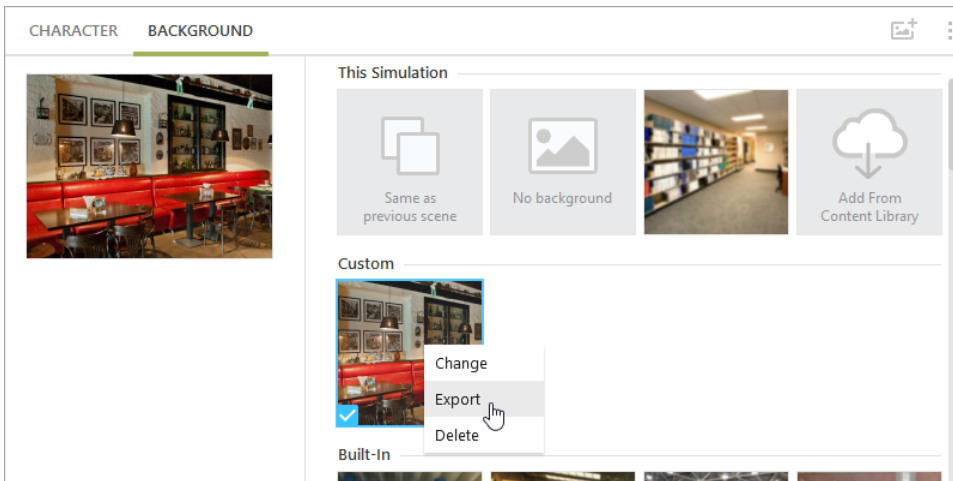

Exporting a Background

You can also export your custom background to import later or share with a colleague.

To export a background:

1. Open the Background library
2. Right-click a background thumbnail in the list and choose **Export** in the context menu.

The background will be saved as an image.

Deleting a Background

To delete your custom background:

1. Open the Background Library.
2. Right-click the background icon and choose **Delete** in the context menu.
