

Creating a New Recording

To start a new recording:

1. Click **New Recording** in the in the Quick Start window. If you want to use iSpring Cam as a component of the iSpring Suite tool, click Screen Recording on the toolbar.

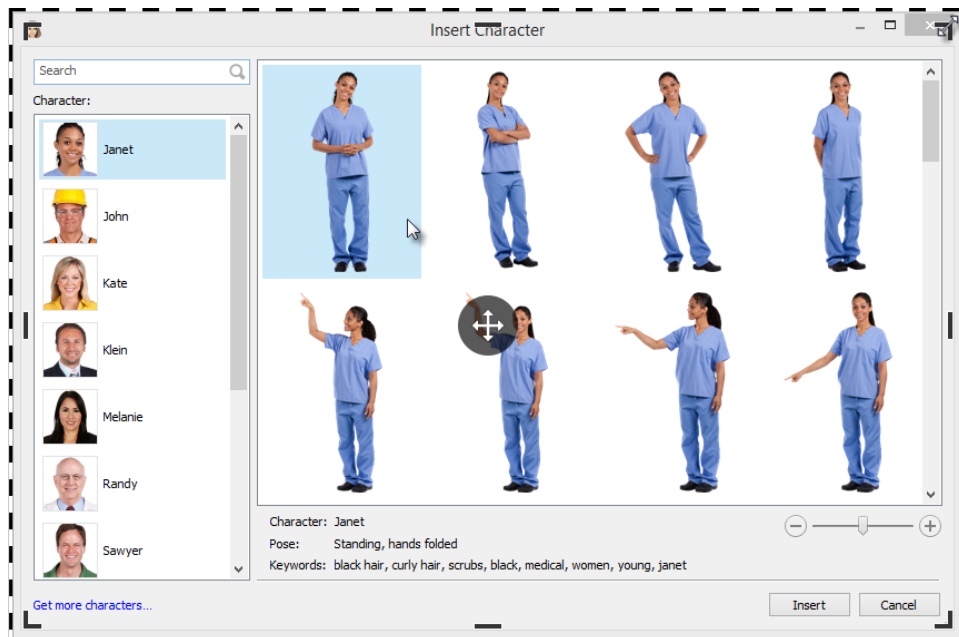

2. The screen recording area will pop up. Select the area that you would like to record from the menu:
 - Video 16:9, 4:3,
 - Fullscreen option (even for multiple monitors)
 - Custom area
 - Particular application

To record just a portion of your screen (custom area), choose **Select area** in the menu. Then, click and drag to outline the area you wish to record on the screen.

If you open iSpring Cam from the iSpring Suite tool, you have the option to record the selected slide of your PowerPoint presentation.

3. Move and resize the recording area to a different location on the screen if necessary.
 - To move the recording area, click and drag the central icon to a new location on the screen.
 - To resize the recording area, click and drag handles around the recording area in or out.

4. When you're ready to start recording, click the red **Start Recording** button on the left side of the iSpring Cam toolbar.

5. When you are finished, you can stop recording by clicking **Done** in the right side of the toolbar or the **Esc** key on your keyboard.

Upon completion, iSpring Cam will show you the [Preview window](#) where you can **edit** your recording with iSpring Video Editor, **save** it as an *mp4 video file or iSpring *.screenrec. project file, and **upload** it to YouTube. If you open iSpring Cam from the iSpring Suite tool, you have an additional option to **insert** your recording right into your presentation slide.

To configure hotkeys, sound recording, mouse cursor, and other advanced options, click the [Settings](#) button on the iSpring Cam toolbar.
