

Publishing Content from iSpring Products

iSpring Learn is a convenient storage for education materials of different types. You can share your courses, slideshows, videos, dialog simulations, interactions with your users and hold the complete control over the training process.

The content of [different types](#) can be uploaded via the admin panel of iSpring Learn. The courses made with iSpring Suite can be published directly from PowerPoint. To do this, choose the **Publish to iSpring Learn** option.

See the instructions on how to publish content to iSpring Learn from different iSpring products:
