Manage Groups

iSpring Learn users with the role of *Administrators*, *Account Owner*, and *Organization Administrator*s may add and remove users, modify information about users, and assign them to groups (see the User Roles and Permissions article). They can also create new groups and remove them.

Note: *Administrators* and *Account Owner* roles allow them to add users of all roles including other administrators. O*rganization Administrators* can add regular users and administrators to the Organization they belong to.

To manage user groups, click the **Groups** tab on the People page.
