Changing User Password

You can change user's password by sending the POST request to the following URL: **/user/<user_id>/password.**

Permission to run the request: Account Owner, Administrator, Organization Administrator.

Request Headers

Parameter	Description
X-Auth-Account-Url (required)	Base URL of the account, e.g. http://myaccount.ispringlearn.com
X-Auth-Email (required)	Administrator/Organization Administrator e-mail address.
X-Auth-Password (required)	Administrator/Organization Administrator password.
X-Password (required)	A new password for the specified user.

A new password should include from 6 to 100 characters with one uppercase letter (A-Z) and a number (0-9).

After the request has been completed, the system returns a response with Code 200.

Possible Response Codes

Code	Text	Description
404	Unknown user	User with the specified ID was not found.
403	Permission denied	You have no permissions to change password the specified user.
200	Ok	User's password has been changed.
400	Bad Request	The system failed to process the request, because the 'X-Password' value is not specified or invalid.
