

# Getting User Profile Fields

You can obtain the list of the user profile fields with the method **getUserProfileFields**.

Permission to run the request: Account Owner, Administrator, Organization Administrator, Publisher.

## Parameters

| Parameter              | Type        | Description                                                     |
|------------------------|-------------|-----------------------------------------------------------------|
| credentials (required) | credentials | Read the description of the <a href="#">Credentials</a> object. |

## Return Value

After the request has been completed, the system returns an object with the following properties.

| Parameter           | Type  | Description                                                                                                                            |
|---------------------|-------|----------------------------------------------------------------------------------------------------------------------------------------|
| userFieldInfo<br>[] | array | An array of objects with the following properties: userFieldInfoId, name, label, type, isUnique, isVisible, isRequired, orderPriority. |

## Sample Call

```
<?xml version="1.0" encoding="UTF-8"?>
<SOAP-ENV:Envelope xmlns:SOAP-ENV="http://schemas.xmlsoap.org/soap/envelope/"
  xmlns:ns1="http://new.webservice.namespace">
  <SOAP-ENV:Body>
    <ns1:GetUserProfileFieldsRequest>
      <ns1:credentials>
        <ns1:accountUrl>http://myaccount.ispringlearn.com</ns1:accountUrl>
        <ns1:email>email@email.com</ns1:email>
        <ns1:password>password</ns1:password>
      </ns1:credentials>
    </ns1:GetUserProfileFieldsRequest>
  </SOAP-ENV:Body>
</SOAP-ENV:Envelope>
```

## Sample Response

```
