

Updating a Content Item

You can update a content item with the `updateContentItem` method.

Permission to run the request: Account Owner, Administrator, Organization Administrator, Publisher.

Parameters

Parameter	Type	Description
credentials (required)	credentials	Read the description of the Credentials object.
contentItemId (required)	string	ID of the content item to be updated.
title (required)	string	Title of the content item.
description (optional)	string	Description of the content item.

Return Value

After the request has been completed, the system returns an object with the following properties:

Parameter	Type	Description
success	bool	'True' if the content item has been updated.

Possible Errors

Error	Description
Unknown content item	The specified content item was not found.
Wrong parameters	The system failed to process the request as some of the required parameters were missing.
Duplicated title	A content item with the specified title already exists.
