## **Setting Up the Microphone**

Before you start recording new voice-overs and narrations, you can set up your mic. With the new Microphone Setup Wizard, you can verify that your audio is set up correctly. Simply connect the microphone, run the Wizard to set volume and mic sensitivity, and use it to record new voice-overs.

Follow these detailed instructions below to setup your mic:

1. Click Record Audio and go to Settings or open the Narration Editor Options in the Narration Editor File menu.

6	Record Audio Narration	
1. (0:05.0)	V	
Slide: 1/1 Click "Start Re	ecord <sup>■</sup> to record audio  Show slide notes Process this slide only	
Start Accord		
	OK Cancel	

2. Start the Wizard by clicking Set Up Microphone and click Next.

	Options	
Slide duration Default duration:	5 seconds	
Sound Recording Microphone:	Microphone (High Definition Audio Device) (Default)	~
Volume:	Low High Set Up Microphone	
Video Recording		
Webcam:	HP Truevision HD (Default)	~
Resolution:	640x480 30fps (Default)	~
	OK Cancel	

3. Now, select your mic in the list and click Next.

	Select a recording device	
	Microphone High Definition Audio Device Ready	
	< Back Next > Cancel	

4. Next, select a recording device type and click Next to proceed.
Headset microphone
Desktop Microphone
Webcam
Other – professional studio mic, clip-on mic etc.

۹	Microphone Setup Wizard ×				
	Select a recording device type				
	Provide a set Microphone     One of the best methods of voice recording. Located near the speaker's mouth,     decreases the amount of background noise.				
	O Desktop Microphone Average quality of voice recording. Located on a table a short distance away from the speaker.				
	Webcam     Low quality voice recording. Webcam or microphone built into any device,     increases the amount of background noise.				
	Other Other recording devices.				
	< Back Next > Cancel				

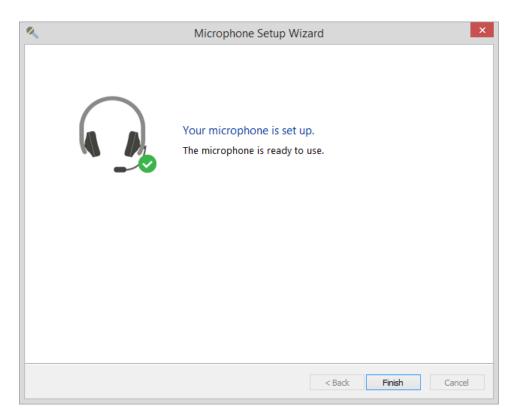

5. Check the recommendations at this step and click Next.

6. Read the text on the screen and click Next, when you are done.

۹	Microphone Setup Wizard		
	Microphone Settings		
	Read the following text aloud:		
	"Matilda is a very fluffy cat. She has a black back, white belly and tail. She has a black snout with long white whiskers. Her eyes are light green, but they turn yellow in bright sunlight. She has big black ears and a small pink nose."		
	<ol> <li>After reading the text, click Next.</li> </ol>		
	< Back Next > Cancel		

7. If the setup finishes successfully, you will see a notification that your mic was properly configured and now it is ready to use.

8. The setup may fail due to a number of reasons. You will see the error description on the screen. You can click **Back** and repeat recording following the recommendations on the error screen.

٩	Microphone Setup Wizard
	It was too loud. Please, make sure that the microphone is located not too close. Speak calmly and clearly. Click <b>Back</b> to repeat the microphone setup or <b>Finish</b> to exit the wizard.
	< Back Finish Cancel

9. If you see the **Change microphone** screen, it's highly recommended to change the microphone, select another device in the list and complete the setup.

() If you are switching from one mic plugged in your computer to another, run the Setup Wizard for the new device.
