

# Getting Started with iSpring Cloud

iSpring Cloud is a file-sharing service tightly integrated with iSpring authoring tools. With iSpring Cloud, you have all your presentations and media in one place that you can access from any device.

Once you create an iSpring Cloud account, you may want to configure it.

The screenshot shows the 'Account Settings' page in the iSpring Cloud interface. On the left is a dark sidebar with the iSpring Cloud logo and two menu items: 'Content' (with a folder icon) and 'Settings' (with a gear icon). The main area has a header 'Account Settings' and a user profile icon. Below the header are three tabs: 'Account' (selected), 'Profile', and 'Billing'. A message states 'This page is for editing your account settings.' with a 'Save changes' button. The 'Account Settings' section displays 'Account URL: pro.ispringcloud.com' and 'Login: irina.selivanova@ispring.ru'. The 'Other Settings' section shows a 'Timezone' dropdown set to '(UTC+01:00)Greenwich Mean Time: Dublin, Edinburgh, Lisbon, L' and a checkbox for 'Force HTTPS.' which is unchecked. Below the checkbox is the text 'Forces browser to switch to HTTPS for all user connections.'

Timezone: (UTC+01:00)Greenwich Mean Time: Dublin, Edinburgh, Lisbon, L ▾

☐ Force HTTPS.

Forces browser to switch to HTTPS for all user connections.

Next, you can proceed to uploading content to your iSpring Cloud account.

The screenshot shows the 'Repository' page in the iSpring Cloud interface. The sidebar is identical to the previous page. The main area has a header 'Repository' with a dropdown arrow. Below the header is a message 'Use this page to share files.' and two buttons: 'Upload' (highlighted with a hand cursor) and 'New' with a dropdown arrow. Below this is a table with three columns: 'Name' (with a sort icon), 'Access', and 'Views'. The table contains two rows of files.
