

# Previewing Published Quizzes

When the Publish process is complete, a new window that shows a preview of your quiz will open. The preview window includes a toolbar and a live preview area.

The screenshot shows a window titled "Quiz Preview" with a toolbar at the top. The toolbar contains buttons for "Desktop", "View in Browser", "Open Folder", "Attach to Email", "Upload to FTP", and "Refresh". Below the toolbar, the question is displayed: "Question 3 of 10" with a point value of 10 and a total score of 0 out of 100. The question asks for the formula to calculate the area of a right triangle. To the right of the question is a diagram of a right-angled triangle with a horizontal base of length 'a', a vertical height of length 'b', and a hypotenuse of length 'c'. The angle at the bottom-left vertex is labeled with the Greek letter beta (β). The right angle is at the bottom-right vertex. Below the question are four multiple-choice options, each with an unchecked checkbox:

- $A = b^2 \times \frac{tg(\alpha)}{2}$
- $A = a^2 \times b$
- $A = \frac{a^2}{2tg(\alpha)}$
- $A = \frac{a \times b}{2}$

A "Submit" button is located at the bottom right of the preview area.

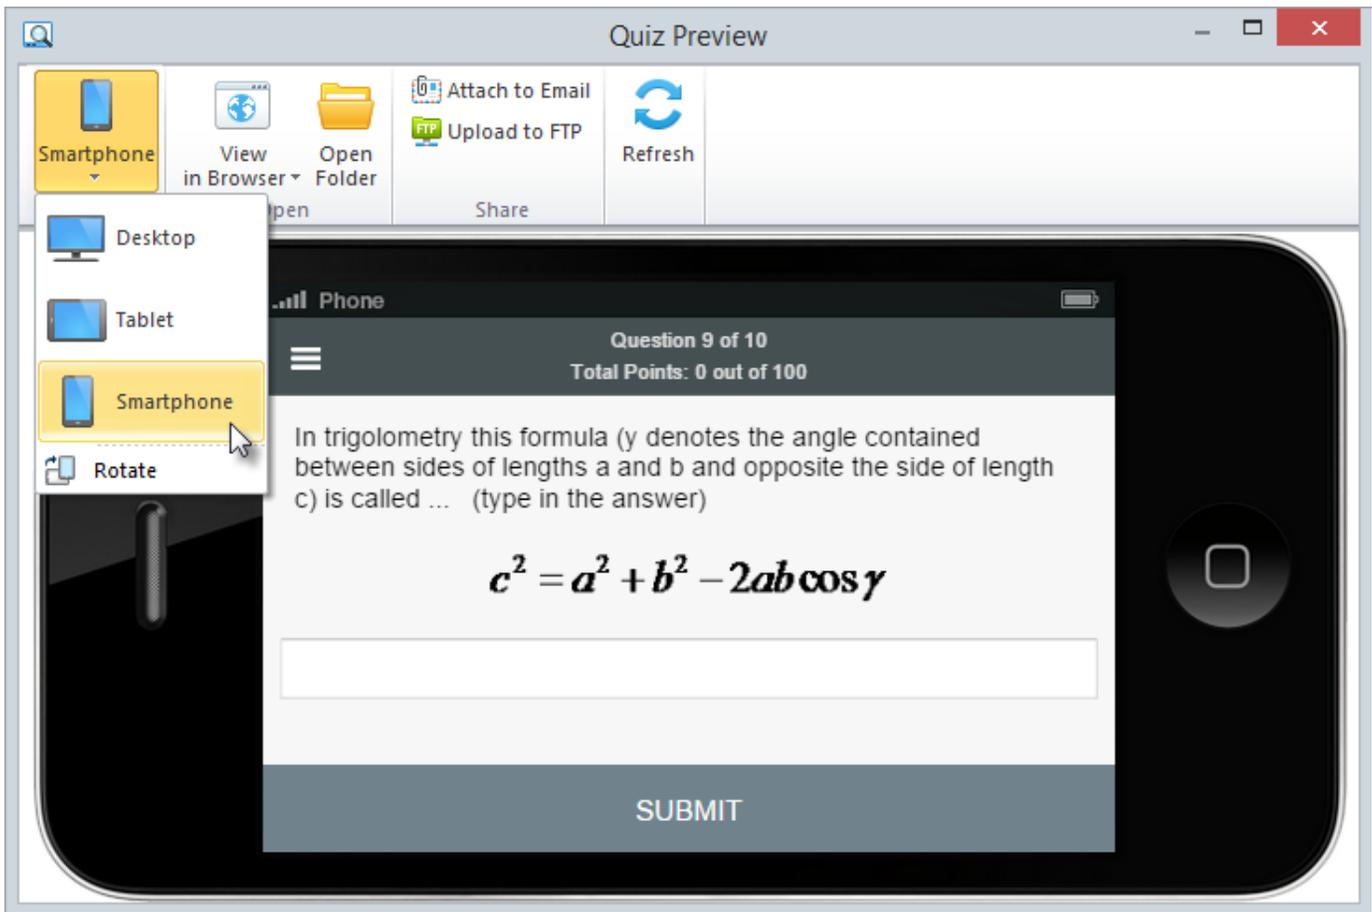

By clicking the corresponding buttons on the toolbar, you can:

- Preview your quiz on any device
- Preview your quiz in any browser
- Access the folder with the quiz files
- Send a quiz to a Web server via FTP
- Email a quiz
- Refresh the content in the preview area

## Choosing a device for previewing

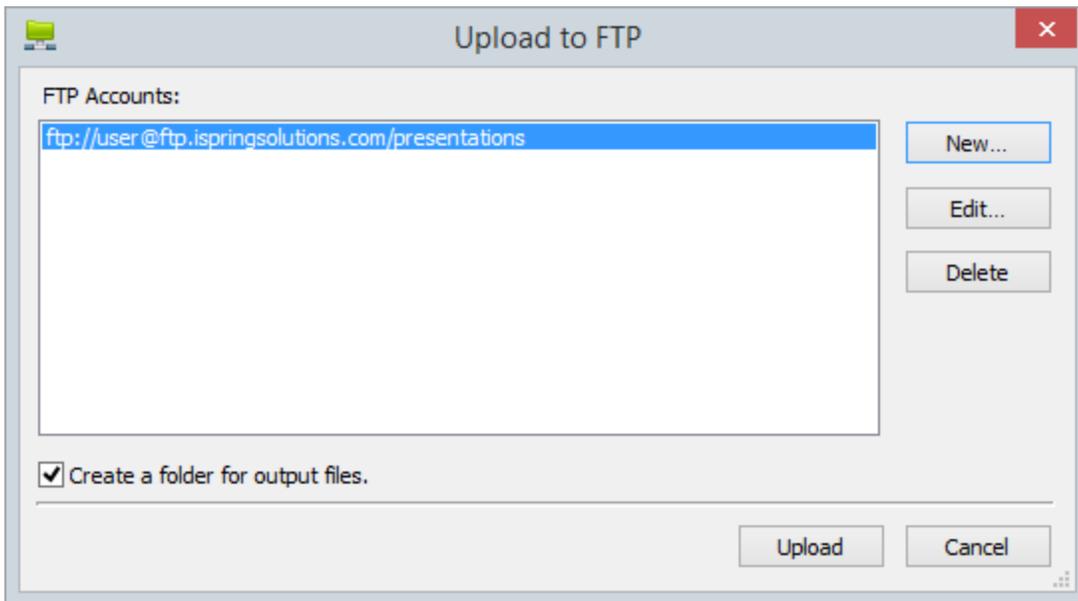

With this option you can preview the quiz on a device of your choice without uploading it to the Internet. Click the **Device** button and choose the device needed. By clicking the **Rotate** button you can also change the device orientation.

**Note:** You can choose the device only when publishing to either HTML5 or Combined format.

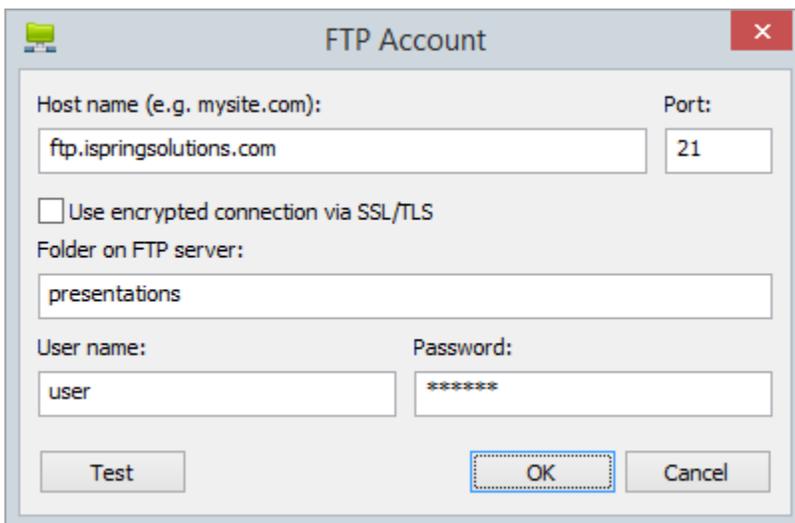

## Uploading Quizzes to FTP

1. Click the **Upload to FTP** button on the toolbar. You will see a window where you can add, edit and delete FTP accounts.
2. Select the 'Create a folder for output files' checkbox to create a new folder with the presentation name on your server.

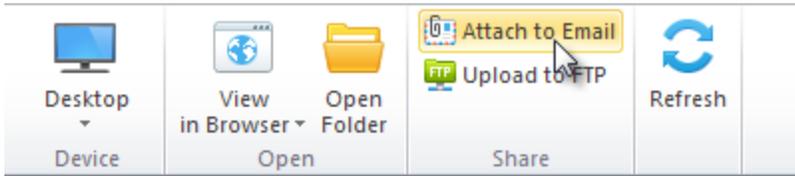

To create a new FTP account, you need to click the **New** button and fill out the form shown below:

FTP Account	
<b>Host name</b>	A host name (e.g. mysite.com) or an IP address (e.g. 77.77.55.88) of the web server where the quiz will be uploaded to.
<b>Port</b>	FTP servers generally use Port 21, but sometimes the port number may differ. For more information, contact your network administrator.
<b>Use encrypted connection via SSL/TLS</b>	The program will establish a secure connection with a server using FTP with TLS/SSL (FTPS).
<b>Folder on FTP server</b>	A path to the folder on the FTP server.
<b>User name</b>	If anonymous access to the FTP is not allowed, type your user name.
<b>Password</b>	If anonymous access to the FTP is not allowed, type your password.

## Sending Quizzes via Email

If you want to send your quiz via email, click the **Attach to Email** button on the toolbar.

A new email with the quiz attached to it will be created by your default email client. You can specify the email address of the recipient and send it.
