Setting Picture Fill

You can apply any image as a question slide background to add a personal touch to your quiz.

In the Format Background window, there are three options available:

- None (no picture fill)
- Texture Fill
- Picture Fill

The added picture or texture will be placed over the solid color background.

Note: Please note that the picture background will not be displayed on cell phones. The picture fill will be replaced with the solid fill selected for a particular slide or a quiz. At the same time, the picture fill works on desktops and tablets.

Texture Fill

To use a texture:

1. Click the **Texture** button in the Picture Fill group

2. Select a texture from the list of the available textures
3. Define the **Transparency** option

To apply the changes only to the current question slide and close the dialog box, click **Close**. To apply changes to all existing and new questions, click the **Apply to All** button.

Picture Fill

To apply a picture fill:

1. Click the **Picture from** button in the Picture fill area

2. Do one of the following:
   - To insert a picture from a file, click **File**, and then locate and double-click the picture that you want to insert.
   - To paste the picture that you copied, click **Clipboard**.
3. Define the **Transparency** option. For more details, check the Picture Fill Options table below.

To apply the changes only to the current question slide and close the dialog box, click **Close**. To apply changes to all existing and new questions, click the **Apply to All** button.

Table 1. Picture Fill Options

Option	Description
Tile picture as texture	By default a picture stretched to fit across the slide. To use multiple copies of the same picture as a texture, select this check box.
Transparency	Adjust the picture and texture transparency to make them lighter. Move the transparency slider between 0% (opaque) and 100% (transparent) until the picture is as light as you want.
