

iSpring Cloud

iSpring Cloud is an ultimate solution for presentation sharing. It lets you rapidly share, demonstrate and embed media presentations while maintaining ease-of-use. iSpring Cloud allows you to generate a variety of statistics on the content in the account.

The screenshot displays the iSpring Cloud interface. At the top left, there is a 'Repository' dropdown menu. To the right is a search bar with a magnifying glass icon and a user profile icon. Below the search bar, there is a section with the text 'Use this page to share files.' and two buttons: 'Upload' (in blue) and 'New' (with a dropdown arrow). A toolbar below this section includes a checkbox for '1 item selected', a 'Download' button, a 'Rename' button, and a 'More' dropdown menu. The main file list contains five items:

Item Name	Actions	Share
My presentations	-	-
Company Story.mp4	Link icon	Share button
Company Story (1).pptx	Link icon	0
Getting Start ... iSpring Cloud.mp4	-	0
IMG_20160509_194128.jpg	Link icon	0

On the right side, the 'PROPERTIES' panel shows details for 'Company Story.mp4':

- Size: 13.88Mb
- Updated: 15/08/2016 08:38

The 'Sharing' section is active, showing a green toggle switch and a shareable URL: <https://ispri.ng/zR6N>. Below this, the status for 'Password', 'Sharing', and 'Download' is listed as 'Disabled', 'Enabled', and 'Enabled' respectively.

The easiest way to share your iSpring content is to use iSpring Cloud solution. Starting with version 7.1, Cloud will be available as an extra tab in the Publish window. Being perfectly tailored for presentation sharing, iSpring Cloud also deals with many other file formats just like that:

- PowerPoint presentations
- Video (.mp4)
- Audio (.mp3)
- Images
- Text documents (.pdf, .doc, .xls)
- iSpring created courses with quizzes and simulations.

When presentations are uploaded to Cloud, they are automatically converted to a cross-platform content while retaining all the applied PowerPoint effects. Moreover, now you can have access to the free app for both online and offline content presenting - [iSpring Cloud](#). iSpring Cloud automatically synchronizes with your Cloud account and lets you have all your presentations at hand, whether online or offline.
