

Configuring the Universal Player

The Universal player is a highly customizable HTML5 and Flash player with the advanced features.

You can configure the player prior to publishing your presentation.

To customize the Universal player:

1. Choose **Universal** from the Player drop-down menu in the General tab.
2. Click the **Customize** button.

The Universal player allows you to customize:

- [Templates](#)
- [Layout](#)
- [Top bar](#)
- [Bottom bar](#)
- [Outline](#)
- [Colors](#)
- [Text Labels](#)
