

Book

The Book interaction allows you to arrange text and images on book pages and publish them as an interactive book.

The image shows a digital book interface. The left page features a blue background with the word "EARTH" in white, serif, all-caps font at the top. Below the title is a high-resolution image of Earth from space, showing the Western Hemisphere with North and South America, the Atlantic Ocean, and the Pacific Ocean. The right page has a white, textured background that looks like paper. It contains three paragraphs of text. At the bottom of the book interface, there is a dark grey bar with a white box containing the text "Pages: 12-13 of 18" and a small white icon of a grid.

EARTH

Earth (1 AU from the Sun) is the largest and densest of the inner planets, the only one known to have current geological activity, and is the only place in the Solar System where life is known to exist.

Its liquid hydrosphere is unique among the terrestrial planets, and it is also the only planet where plate tectonics has been observed.

Earth's atmosphere is radically different from those of the other planets, having been altered by the presence of life to contain 21% free oxygen. It has one natural satellite, the Moon, the only large satellite of a terrestrial planet in the Solar System.
