

# Hiding Slides

You can mark any slide as hidden by clicking the **Hide Slide** button on the toolbar or double clicking its thumbnail.

Hidden slides are not displayed in the outline of the player. They are skipped during presentation playback. Please note that hidden slides still exist in your presentation and can be accessed using hyperlinks or action buttons on the other slides.

The screenshot shows the 'Presentation Explorer' window. The toolbar at the top includes buttons for 'Save & Close', 'Hide Slide', 'Promote Demote', 'On-Click Auto', 'Branching Lock', 'Presenter', and 'Layout'. The 'Hide Slide' button is highlighted with a red callout that says 'Click 'Hide Slide' to hide/show the selected slides'. Below the toolbar is a table with columns: #, Title, Advance, Branching, Lock, Presenter, Layout, and Object. Slide 2 is selected and has a 'hidden' label on its thumbnail. A red callout points to the thumbnail with the text 'Double-click a slide thumbnail to hide/show a slide'.

#	Title	Advance	Branching	Lock	Presenter	Layout	Object
1					None	No Change	+ Quiz + Interaction
2	Animations: Entrance Effects				Geoseffe T...	No Change	+ Quiz + Interaction
3					Geoseffe T...	No Change	+ Quiz + Interaction
