

Course Completion Condition

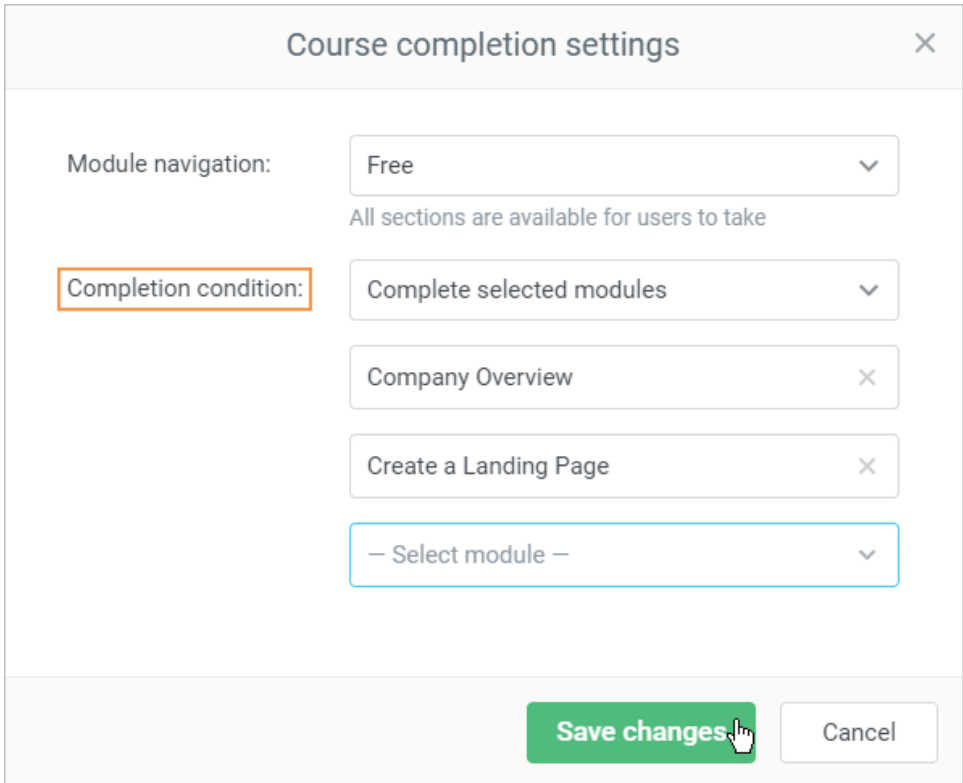

Specify when the course is considered passed: when all its modules are completed or just some of them. By default, all content items added to the course are required to pass.

1. On the **Edit Course** page, open the **Outline** tab and click **Course Settings**.

2. In the **Course completion settings** window, choose one of the options in the **Completion condition** menu. Then, click **Save Changes**.

Complete all modules	The course will be considered passed when students finish all content items included in the course.
Complete selected modules	The course will turn to completed as soon as specified content items are passed.

Important:

1. To complete viewing a video, users need to view 95% of the clip.
2. Let's say, you deleted the last required to pass module from the course, and the course status automatically changed to **Completed**. The date of the course completion will be the completion date of the last remained required module.
