After you complete steps 1,2,3, you can choose whether to activate your license online or offline.

Online Activation

The fastest way to activate the license is to go through the online activation procedure. To do it, keep the **Attempt to activate my license online now** option checked and click **Next**. Online activation requires an active Internet connection. It usually takes just a few seconds to complete the online activation process.

The image shows a Windows-style dialog box titled "iSpring TalkMaster Activation Wizard". The main heading is "Enter Registration Details" with a subtext "These registration details will be displayed in your iSpring product" and a key icon. Below this, it says "This product is registered to:" followed by two text input fields: "Name: John Smith" and "Company: iSpring". At the bottom, there is a checked checkbox labeled "Attempt to activate my license online now". The bottom of the dialog features four buttons: "< Back", "Next >" (which is highlighted with a dashed blue border and a mouse cursor), "Cancel", and "Help".

After successful activation, you will see the number of remaining activations and the total amount of the allowed activations for your license.

Manual Offline Activation

To perform offline activation:

1. Clear the **Attempt to activate my license online now** checkbox, enter your registration information and click **Next**.

Manual License Activation

Step 1
To activate your license manually you need to send the license request code and your license key to iSpring Support Team.

License request code:

License key:

Step 2
Please enter the license activation code you received from iSpring Support Team and click Next.

License activation code:

Activation process should be complete within 3 days after you entered the license key. If the license is not activated within this period, an evaluation watermark will be added to your simulationzses.

The license activation binds the product to a given computer and its operating system. As the number of the allowed activations is limited, you should [deactivate a previously activated license](#) in case you want to reinstall the operating system or activate the license on another computer. This way you will not lose your activations.
