

# Applying Penalties

With iSpring QuizMaker, instructors have the ability to deduct points for incorrect quiz answers. Negative points may be used in all types of questions in graded quizzes.

If a user chooses an incorrect answer, penalty points will be subtracted from the total amount of points he or she earned.

You can specify the amount of negative points in **Quiz Properties -> Question Defaults -> Penalty**. The penalty will be applied to all questions that use default settings. To indicate custom penalty points for a specific question, enter a penalty value in the **Options** tab of a question.

Options Feedback and Branching

Use default options

Score: By Question

Points: 10

Penalty: 5

For two question categories: Multiple Choice and Multiple Response, a penalty can be applied per each answer choice.

To set penalty points by answer:

1. Choose **Score by answer** in the Options tab
2. Specify negative points per each incorrect answer option. Penalty point should start with the minus sign.

Correct	Premise	Points
<input checked="" type="radio"/>	 the French	10
<input type="radio"/>	 the Swedish	-5
<input type="radio"/>	 the English	-3
<i>Type to add a new item</i>		

The score for the question will be a sum of the negative and positive points.
