

# Changing Color Scheme

In the Color Scheme section, you can customize the header and menu colors to reflect your company's brand.

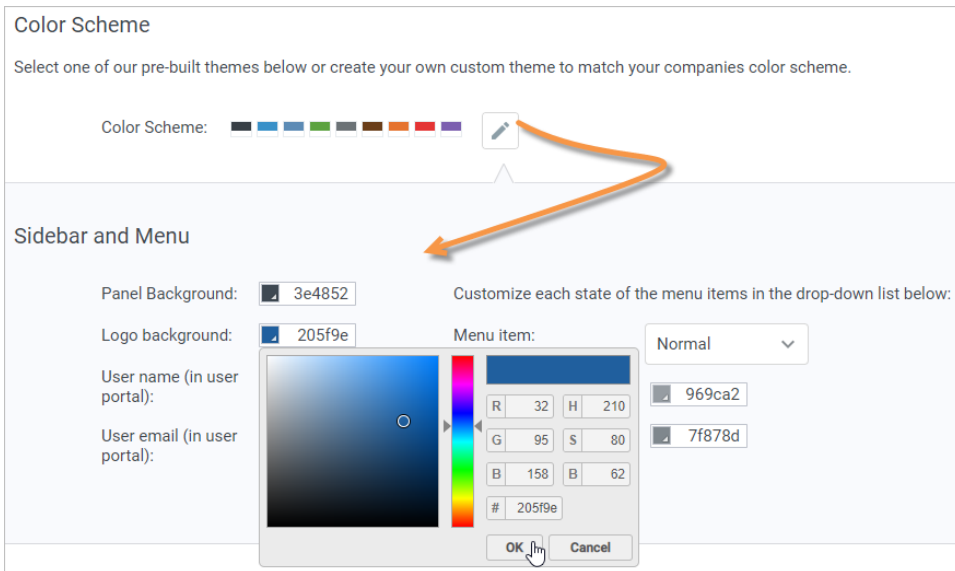

To change the color scheme of your iSpring Learn account, complete the following steps:

1. Open the **Branding** tab on the Settings page.
2. In the **Color Scheme** section, select one of the pre-built themes or create your own custom color theme.

To create a new color theme:

1. Click the  pencil icon to open the custom colors menu.
2. Select a new color of the background, menu items and links.

3. All your changes will be applied instantly. To check how your modifications will be displayed to the Portal users, click the **User Portal** link.

Here you can configure your account branding. Change your account design - styles, logo, favicon.
