

Navigation

In this area, you can arrange the order of submitting questions and create a pool of questions.

The screenshot shows the 'Quiz Properties' dialog box. At the top, there is a gear icon on the left and a close button (X) on the right. Below the title bar, the 'Quiz type' is set to 'Graded' (selected with a radio button) and 'Survey' is unselected. On the left side, there is a vertical navigation pane with four items: 'Main', 'Navigation' (highlighted in orange), 'Question Defaults', and 'Result'. The main content area is divided into two sections: 'Navigation' and 'Question Pool'. In the 'Navigation' section, there is a 'Preset' dropdown menu set to 'Linear / Branched Scenario'. Below this, there are four options: 'Submit one question at a time' (selected with a radio button), 'Allow user to postpone questions' (checked with a checkbox), 'Submit all at once' (unselected with a radio button), and 'Allow user to finish without answering all questions' (unchecked with a checkbox). In the 'Question Pool' section, there are three options: 'Include all groups from the quiz' (selected with a radio button), 'Select random groups: All out of 1' (unselected with a radio button, where 'All' is in a dropdown menu), and 'Shuffle questions from the selected groups' (unchecked with a checkbox). At the bottom right of the dialog box, there are 'OK' and 'Cancel' buttons.

Presets

Choose one of the preset profiles from the drop-down menu:

- Linear / Branched Scenario
- Submit all at once
- Random Order
- Custom

Submit one question at a time	Choose this option to receive a feedback message right away.
Submit all at once	Choose this option to receive total points at the end of the quiz.
Allow users to finish without answering all questions	Select this option if you want to allow quiz takers to interrupt a quiz. If you clear this checkbox, quiz takers will have to complete the quiz before they are allowed to finish it.
Include all groups from the quiz	Select this checkbox to present all groups of questions of your quiz to quiz takers (as opposed to showing a random groups).
Select random groups	Use this option to create a quiz with a pool of questions. When selected, only a specified number of groups will be presented to a quiz taker (as opposed to showing all the questions). In this case, you can add as many questions to your quiz as you want; every quiz taker will get the same specified number of different questions.
Shuffle questions from selected groups	Select this checkbox to randomize questions' order.
