

Reports

iSpring Learn collects detailed statistics on every content item and every user. The information received helps to figure out what causes difficulties in the training process, which content becomes the most popular, and many other useful things about learners. Knowing this, you can make some amendments to your courses and, thus, improve the training process in your company.

In the **Reports** section, you can track how users take training learning tracks and courses, view the list of events held for a certain period of time, check which users attended the events, and see how active users were when studying learning content.

The screenshot shows the iSpring Learn interface. On the left is a dark sidebar with the iSpring Learn logo and a list of navigation items: Dashboard, Courses, Reports (highlighted with a mouse cursor), Events, Users, Knowledge Base, Course Questions, and Settings. The main content area is titled 'Reports' and is divided into two sections: 'By Learners' and 'By Courses'. The 'By Learners' section contains three report options: 'Learner Progress' (with a person icon), 'Department Progress' (with a building icon), and 'Group Progress' (with a group of people icon).
