

Deleting Expert

If you have decided that your content item doesn't need an expert, remove them.

1. To do this, locate the course in the **Courses** section and left-click on it.

2. On the **Edit Course** page, open the **General** tab.

3. Scroll the page down to the **Course Expert** section and erase the expert name in the **Expert name** field.

4. Click the **Save** button.

The screenshot shows the 'Edit Course' interface for a course titled 'Sales Onboarding'. At the top, there is a navigation bar with a back arrow, the text 'Edit Course', and icons for email, notifications, and a user profile. Below this, the course title 'Sales Onboarding' is displayed in a large font, with the word 'Course' underneath it. A horizontal menu contains several tabs: 'Outline', 'General' (which is highlighted with a green underline), 'Notifications', 'Availability', and 'More' with a dropdown arrow. Below the menu, there is a text prompt: 'On this page, you can edit the information about your course.' To the right of this text is a prominent green button labeled 'Save', with a mouse cursor hovering over it.

5. After the expert is deleted from the course, the **Contact the Expert** option on the course page will disappear.

Important:

1. If you deactivate a user assigned as an expert, the option to ask an expert will be gone.
2. If you reactivate the user who was earlier assigned as an expert, the option to ask an expert will appear on the content page again.
3. If you delete the user assigned as an expert, the option to ask an expert will disappear and won't reappear even if this user registers in the system again.
