

Settings

To change the iSpring Learn settings, open the **Settings** tab in the side menu. On this page, you can configure the general settings for your iSpring Learn account.

The screenshot shows the iSpring Learn Settings interface. On the left is a dark sidebar with the iSpring logo and navigation items: Dashboard, Learning Paths, Content, Discussions, Reports, Events, People, and Settings (highlighted). The main content area is titled 'Settings' and has a user profile icon in the top right. Below the title are tabs for 'Main', 'Branding', 'Additional Options', and 'Billing'. The 'Main' tab is active. A green 'Save' button is in the top right of the main content area. The main content area contains the following sections:

- Account Name**: A text input field containing 'Training'. Below it, a note states: 'The account name is used to identify your iSpring Learn account.'
- Account URL**: A text input field containing 'training' followed by '.ispringlearn.com'.
- Notify all users about changes**
- Domain aliases**: An empty text input field.

A user with the administrative rights is allowed to edit all the account preferences except billing information. The *Account Owner* is the only person who has access to the *Billing* section.
