

# Deactivating iSpring Pro License

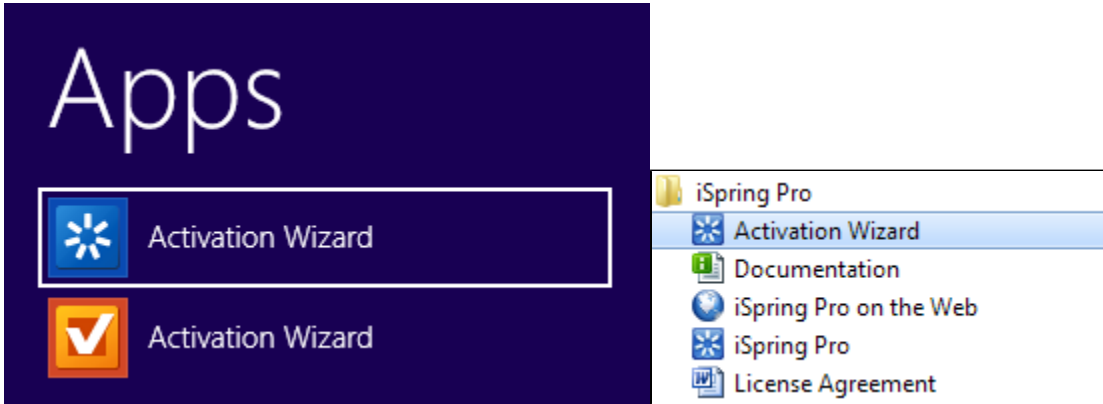

A one-seat license of iSpring Pro allows two activations of the product. For example, it can be installed on your work computer and on your home laptop. If you want to move iSpring Pro to another computer or reinstall the operating system on your PC, you need to deactivate the license. You can either deactivate a license without removing the software from your computer or uninstall and deactivate your iSpring Pro.

- [Uninstalling iSpring Pro](#)

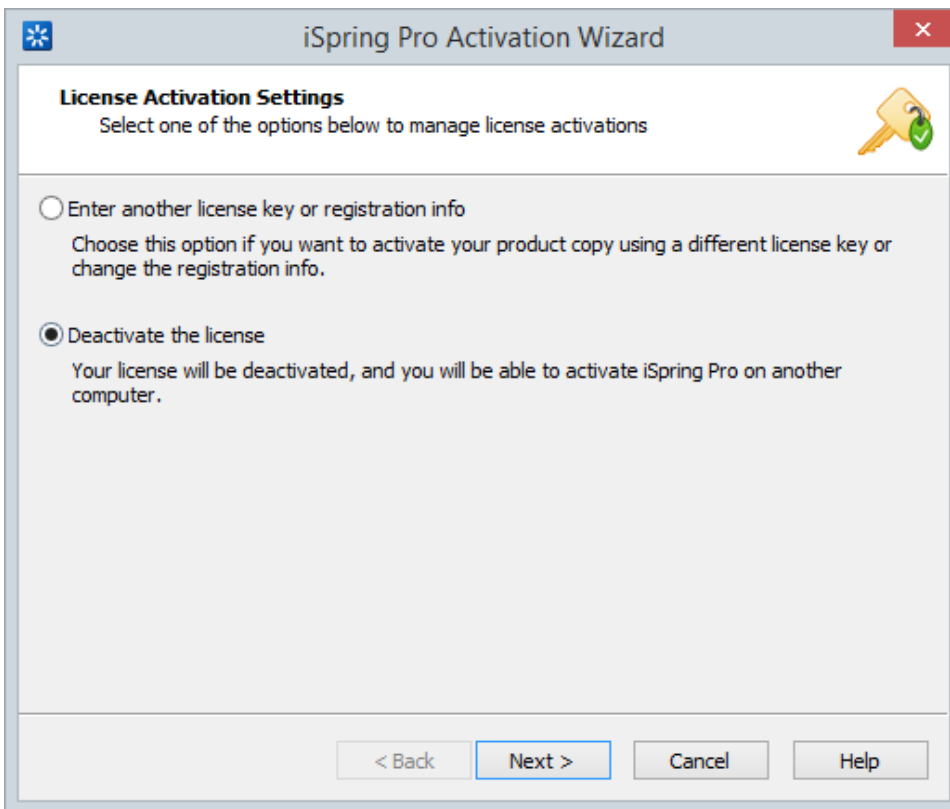

## Activation Wizard

It is possible to deactivate your license without uninstalling iSpring Pro. Perform the following steps:

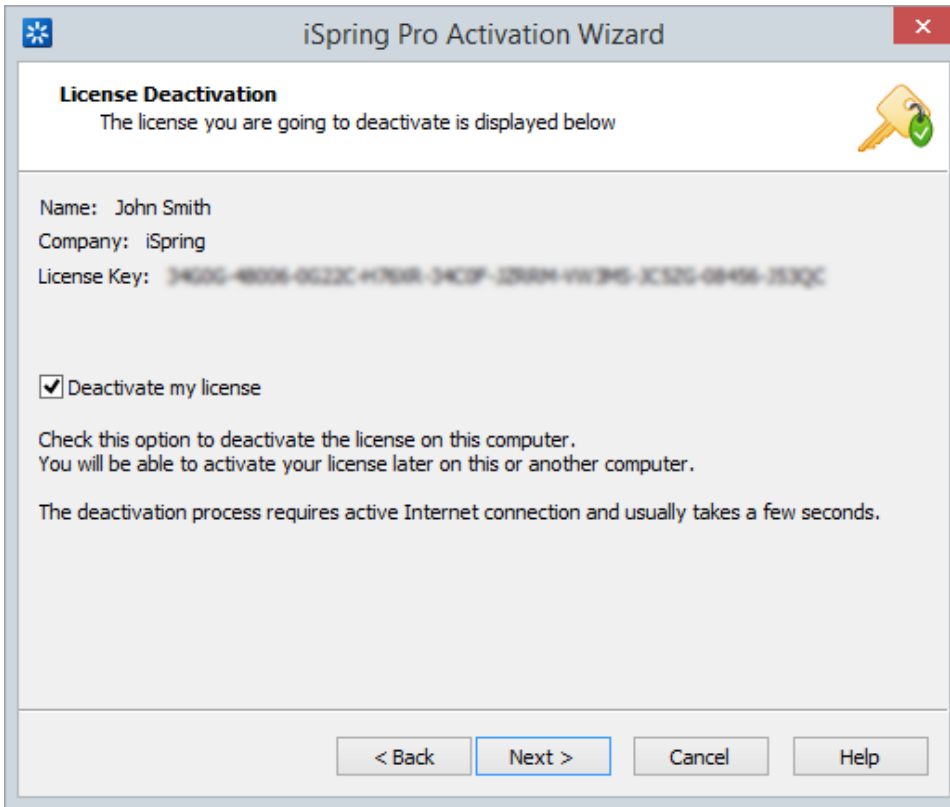

1. Launch the Activation Wizard from the program menu folder.

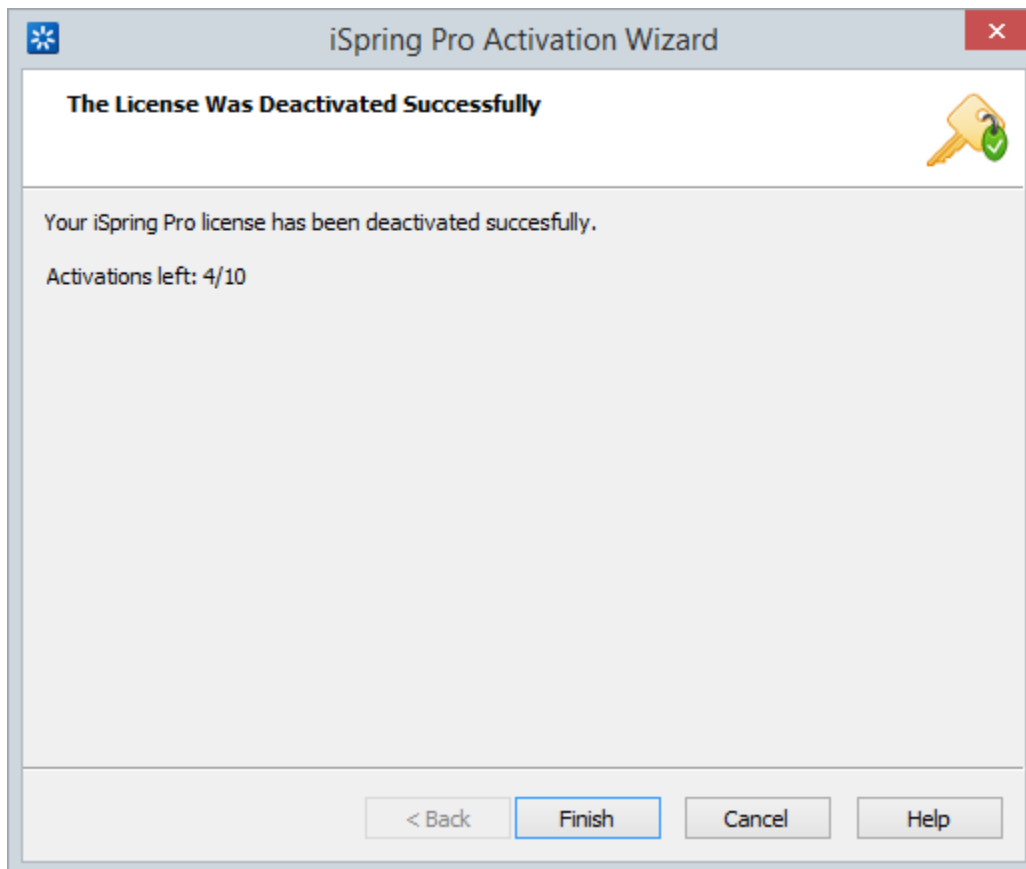

2. Choose **Deactivate the license** and click **Next**.

3. Select **Deactivate my license** and click **Next**.

After successful deactivation, the Activation Wizard will display the number of the remaining activations out of the total number of activations.

Uninstalling iSpring Pro

To uninstall your iSpring Pro:

1. Go to the Windows Start menu -> Control Panel -> Programs. Choose the Uninstall a program option. Then, select the application you want to remove.
2. When uninstalling iSpring Pro, please choose the **Deactivate my license** option in the Deactivation Wizard. Your license will be deactivated, and you will be able to activate iSpring Pro on another computer.

3. After successful deactivation, the program will display the number of remaining activations and the total number of activations.
