# Publishing for LMS

With the *LMS* option, you can create a package for uploading to any learning management system. To create a package to upload to an LMS, select the standard that your LMS supports: SCORM 1.2, SCORM 2004, AICC, Experience API (Tin Can), or cmi5, and publish the course.

> ⓘ To test and adjust online courses, we recommend using the SCORM Cloud service.
>
> SCORM Cloud allows you to check how your SCORM, AICC, xAPI, or cmi5 courses will be working in LMSs and what results they will return.
>
> If the content size is not larger than 100 Mb and the number of registered learners doesn't exceed 10, the SCORM Cloud service will be free.
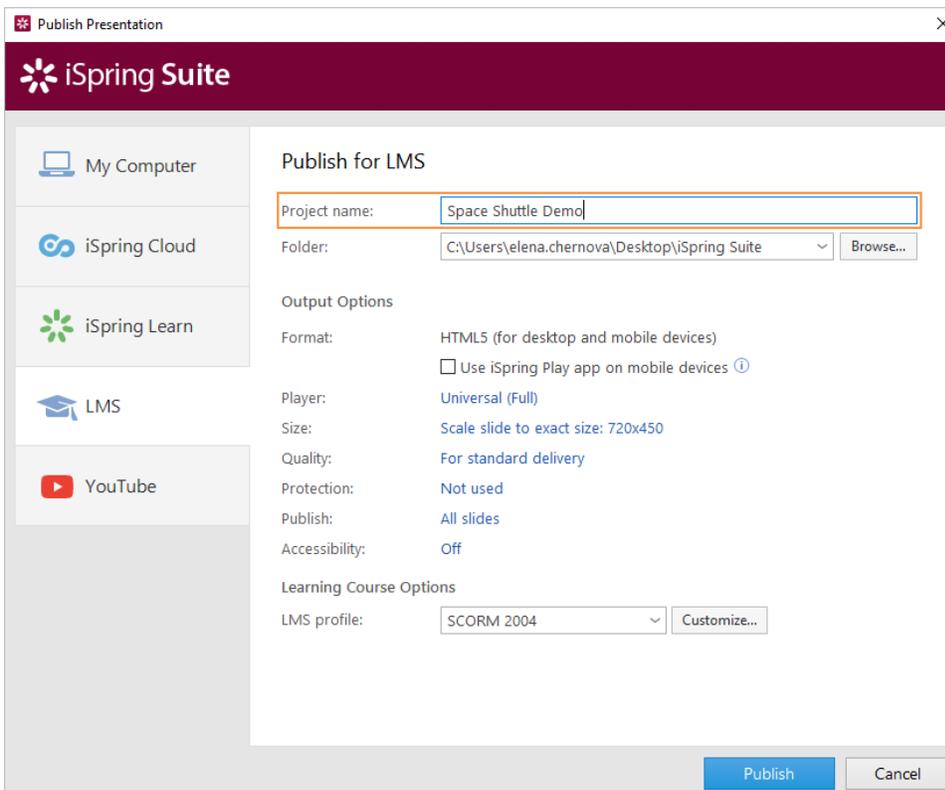

1. Click **Publish** on the toolbar from the **iSpring Suite 9** tab in PowerPoint.

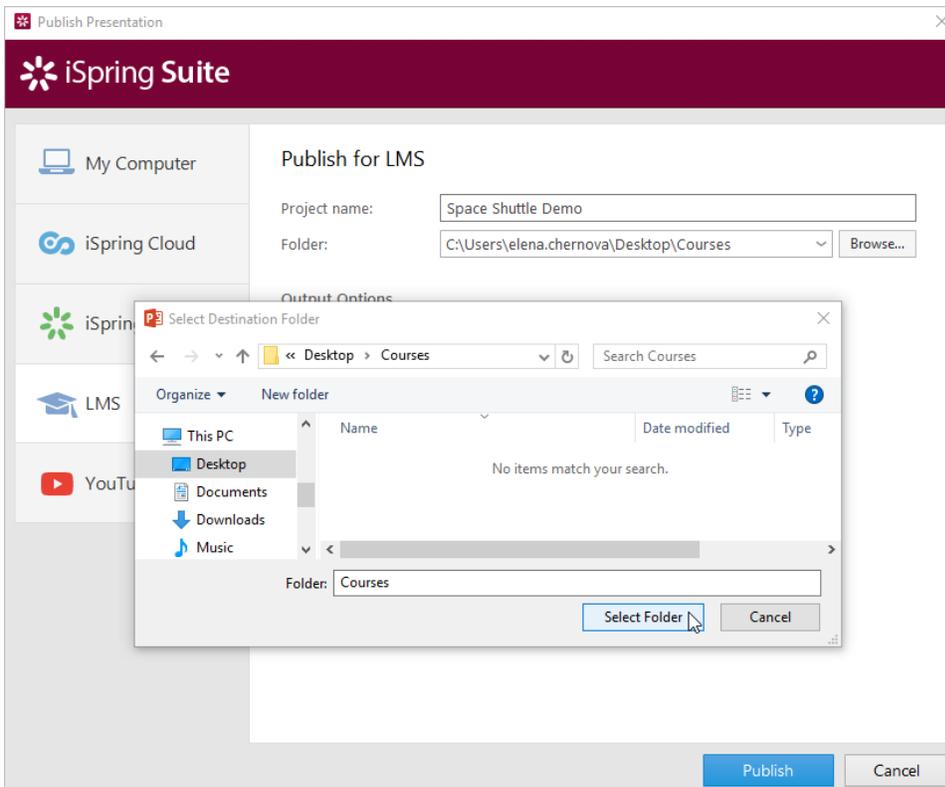

2. Select the **LMS** tab on the left.

3. Enter a title for the course in the **Project name** field.

4. Specify the local or network folder in which the course will be saved in the **Folder** field. To do this, click the **Browse...** button to the right, choose the folder, and click **Select Folder**.

5. Then, set up output options:
   - enable iSpring Play app to open the course on mobile devices,
   - select the player type or customize already chosen player,
   - specify how the course behaves in a browser,
   - select the quality level of images, audio and video files,

- configure protection settings for your course,
- choose which slides you would like to publish (all or only the selected one),
- publish the presentation in the accessible mode.

6. In the **LMS profile** field, select the standard that your LMS supports:

- SCORM 1.2
- SCORM 2004
- AICC
- Experience API (aka Tin Can)
- cmi5

Click on the **Customize** button on the right to change the settings for each standard. Details about the settings are described in the Learning Course Settings article.

7. Click the **Publish** button to publish the course.

8. In the window which will open after the publishing process is done, the following options are available:
    *   view the presentation in a browser,
    *   open the course in a folder on your computer,
    *   upload the content item to iSpring Cloud,
    *   send the presentation as an email attachment,
    *   upload the material to an FTP server.

Publishing is complete!

The course "Space Shuttle Demo" has been published successfully.
