

Creating a Course with Educational Videos

To add a screen recording to your course slide:

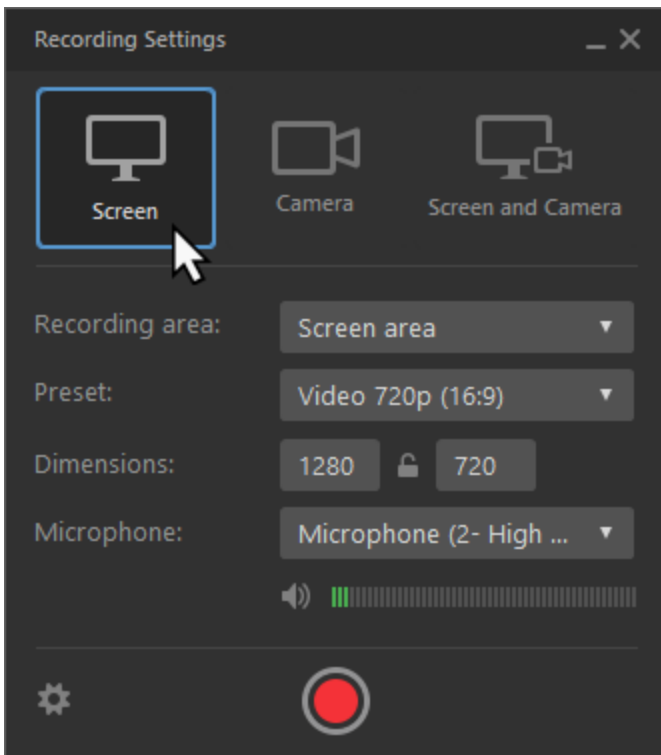

1. Click **Screen Recording** on the toolbar.

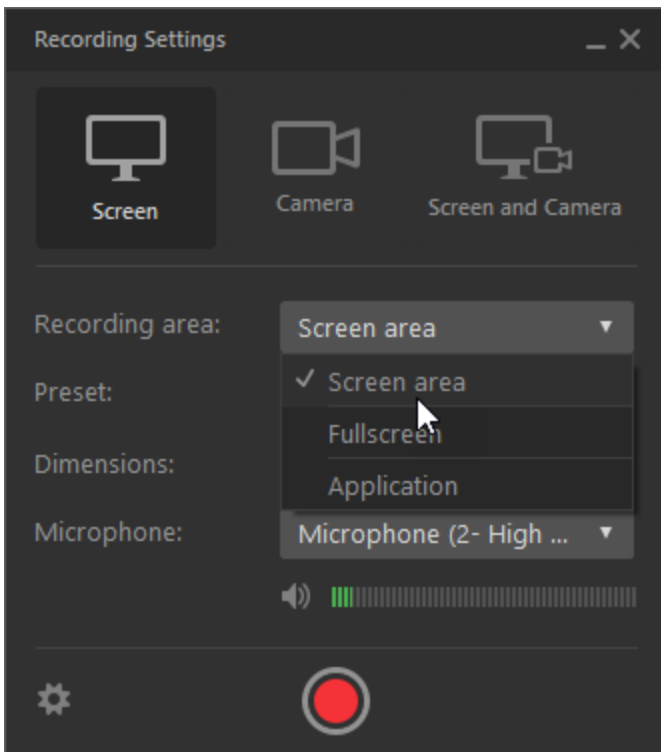

2. Choose whether to **Create** a new recording or project, or **Browse** for a screen recording that you've previously created.

3. Choose what you want to record: your screen, webcam, or both at the same time.

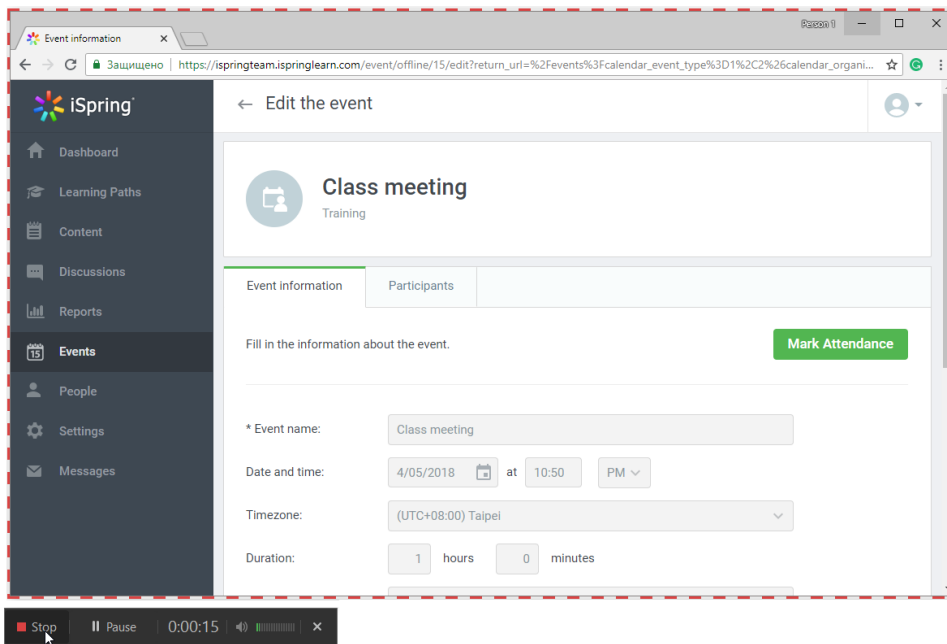

4. Next, select the **recording area** to record your screen, slide, or a specific application.

5. Click **Start** to begin the recording.

6. Record your video and click **Stop (F10)** when you're finished.

7. Upon completion, the iSpring Cam Pro editor will open up, where you can edit your recording, add annotations, images, audio and video recordings to it, apply smooth transitions between parts of the video, and much more.

8. To insert the recording onto a slide and return to your course, click **Save and Return** in the View Recording window.

Your video recording will be placed on the selected slide of your presentation. If you want to edit your your video, select the slide containing the recording and click **Screen Recording** on the toolbar.

To **remove** the recording from your course, select it on the slide and click **Delete** on your keyboard.
