

Creating a Flipbook

iSpring Suite 9 comprises iSpring Flip, a powerful tool for creating eBooks from PowerPoint presentations and MS Word and PDF documents. Get full information on using this software program in the [iSpring Flip 9 User Guide](#).

To start creating an electronic book or a flipbook, open the [Quick Start](#) window of iSpring Suite. Open the **Books** tab and choose the type of the document you want to convert into a book.

In [the editor](#), you can view the document and immediately get it published.

To publish an eBook, click the **Publish** button on the iSpring Flip toolbar. Then, in the **Publish Book** window, select the publishing destination and set up output options. Next, click the **Publish** button.
