

Experts

While taking a course or reading through a page, your users might have lots of questions. To allow your students to receive advice from a professional, add an expert, a person who is proficient in the subject of the course.

By default, the course expert is its author. But, if you need to, you can always [assign another person as an expert](#).

Learning tracks, however, don't have any default expert assigned. You will have to assign one manually.

The screenshot shows a user interface for a course titled "Exploring the Universe". At the top, there is a navigation bar with icons for "My Courses", "Events", "Achievements", "Catalog", and "Knowledge Base". A "Write an expert" button is visible in the top right corner of the course banner. The course banner itself features a background image of people studying at a table, with the text "Exploring the Universe" and "In Progress (33.33% viewed)". Below the banner, there are tabs for "Outline", "About Course", "Reviews (2)", and "Questions and Responses (1)". The "Outline" tab is selected, showing a list of course items:

Item	Status
Space Shuttle Learning Module • 5 slides	Not Started
Saturn Approach - Voyager PowerPoint Presentation • 13 slides	Completed
Milky Way Article	Not Started
