

# List

The information is easier perceived and better memorized when it's delivered in the form of lists.

To add a list to the page:

1. lick , and select **List**.

2. Now you can organize your text as a bullet list. Write some text next to a bullet and press **Enter** on the keyboard to move to a new point. As you decide to finish the list, simply press **Enter** without typing any text against the bullet.
