

Settings and Security

You can set up the following settings for your iSpring Learn account:

- [Timezone](#)
- [Strong Password](#)
- [Deleting Users while Importing from XLSX](#)
- [CAPTCHA](#)

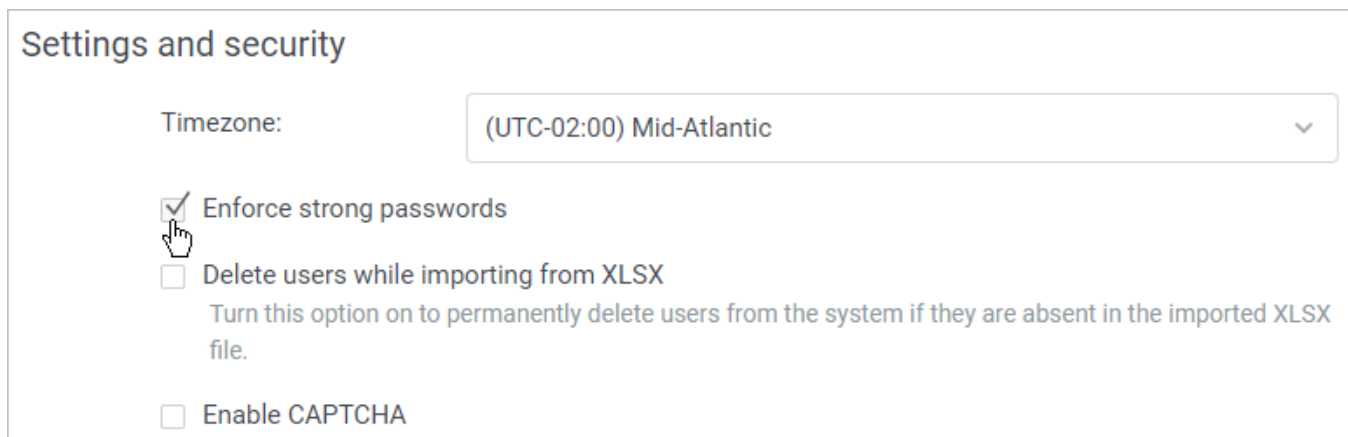

Timezone

Select the timezone for your iSpring Learn account and click **Save**.

Strong Password

To enable strong passwords in your account, check **Enforce strong passwords** and click **Save**.

If you switch on this option, your users will use a strong password. A strong password should consist of Latin letters (a-z, A-Z), contain at least one capital letter (A-Z) and one number (0-9). Its length should be 6 characters and more.

If this option is disabled, users may enter a simpler password that consists of 6 and more characters without any extra requirements.

Deleting Users while Importing from XLSX

Select this option if you want to delete all existing users when [importing new ones](#) via a XLSX file.

Settings and security

Timezone:

(UTC+00:00) UTC

Enforce strong passwords

Delete users while importing from XLSX

Turn this option on to permanently delete users from the system if they are absent in the imported XLSX file.

Enable CAPTCHA

CAPTCHA

To protect the account from spammers and bots, enable CAPTCHA and click **Save**.

Settings and security

Timezone:

(UTC-02:00) Mid-Atlantic

Enforce strong passwords

Delete users while importing from XLSX

Turn this option on to permanently delete users from the system if they are absent in the imported XLSX file.

Enable CAPTCHA

This computer test will help to determine if the user attempting to access the system is a human or a program.

If CAPTCHA is enabled in your account, users will have to pass through the 'I'm not a robot' test every time they sign in.
