

Reviews in the User Portal

As soon as users complete a course, they can leave a review about it and submit a star rating.

1. Open a course and select the **Reviews** tab. Then, click the **Please leave a review to help us improve this course** line.

2. Now rate the course and type your review. Then click **Post**.
A learner can rate a course from 1 to 5 stars without typing a text review. However, a text review can't be left without a star rating.

3. Your review is posted. Now, it will be seen by other users who are enrolled in the course, learners who [open the course in the Catalog](#), and [the administrators](#).

If there are a few reviews posted for the course, an average rating will be displayed under the Reviews tab, This is calculated as the arithmetic means of all ratings submitted to the course.

Delete

A student can leave only one review per course. However, if a review has been deleted, the user can post another one.

Review Notification

If a learner hasn't left a review on a course within 24 hours of its completion, a notification asking the learner to write a review will arrive at the notifications center in their account.

Notifications ⌵

[Mark all as read](#)

You've recently completed the course *Exploring the Universe*. Please leave a review for it.

5 days ago

When the student clicks on the notification, the course on which they are supposed to leave a review will open.
