Actions with Content and Folders

You can select a file in the list of content and perform the following actions by either using the menu of actions or contextual menu:

Name	Action
1. Select All	Mark the checkbox in the subheader to select all files and folders within the folder.
2. Download	Download the selected items
3. Rename	Rename a file in the content list
4. Copy	Copy the selected items to a folder in your account
5. More	More button reveals the menu with the following actions: Move, Replace and Delete Move the selected items to another location, replace it with a new file, move to trash for permanent deletion.
6. Share	Use one of the tabs to directly access one of the sharing methods: email, social networks or embed code

ⓘ You can *replace* all content types except folders.
