

Move Content

To move content to a folder:

1. On the **Content** page, select content items and folders that you want to move (use check boxes in the rightmost column of the content list).
2. Right-click the content title and click **Move** in the context menu. A window with a list of folders will pop up.

3. In the popup window, select a folder, where you want to move the selected content.
4. Click **Move Content**. Selected content will be moved to the specified folder.
