

Adjusting Slide Duration

You can set timing for automatic slide advance in the field to the right of the slide advance type. It's also possible to specify duration for a selected group of slides in the corresponding text field on the toolbar.

Time formatting works similar to PowerPoint.

Note: Slide advance time also depends on "Minimal slide duration" that can be specified on the [Playback and Navigation](#) tab of the Publish window.

The screenshot shows the 'Presentation Explorer' window with a toolbar at the top and a table of slides below. The toolbar includes buttons for 'Save & Close', 'Hide Slide', 'Promote', 'Demote', 'On-Click', 'Auto', 'Slide Duration' (set to 00:06.50), 'Branching', and 'Lock'. Below the toolbar are sections for 'Save', 'Display Slides', 'Nesting Level', 'Advance Slide', and 'Presenter and Layout'. The table has columns for '#', 'Title', 'Advance', 'Layout', and 'Object'. Slide 2 is selected, and its duration is 6.5s. A red callout points to the 'Slide Duration' field in the toolbar, and another points to the '6.5s' value in the table.

#	Title	Advance	Layout	Object
1	PowerPoint to Flash Excellence	5.0s Default	None No Change	+ Quiz + Interaction
2	Animations: Entrance Effects	6.5s Default	Melany Wil... No Sidebar	+ Quiz + Interaction
3	Animations: Exit Effects	Default	Melany Wil... No Change	+ Quiz + Interaction
