

Hiding Slides

You can mark any slide as hidden by clicking the **Hide Slide** button on the toolbar or double clicking its thumbnail.

Hidden slides are not displayed in the outline of the player. They are skipped during presentation playback. Please note that hidden slides still exist in your presentation and can be accessed using hyperlinks or action buttons on the other slides.

The screenshot shows the 'Presentation Explorer' window with a toolbar at the top and a table of slides below. The toolbar includes buttons for 'Save & Close', 'Hide Slide', 'Promote Demote', 'On-Click Auto', 'Branching Lock', and dropdowns for 'Presenter' and 'Layout'. The table has columns for '#', 'Title', 'Advance', 'Branching', 'Lock', 'Presenter', 'Layout', and 'Object'. Slide 2 is highlighted in blue and has a 'hidden' label on its thumbnail. Two red callout boxes provide instructions: one pointing to the 'Hide Slide' button and another pointing to the thumbnail of Slide 2.

#	Title	Advance	Branching	Lock	Presenter	Layout	Object
1	Best Engineering Technology	5.0s	Default		None	No Change	+ Quiz + Interaction
2	hidden	6.5s	Default		Geoseffe T...	No Change	+ Quiz + Interaction
3		7.3s	Default		Geoseffe T...	No Change	+ Quiz + Interaction
