

# Deleting Instructor

If you have decided that your content item doesn't need an instructor, remove them.

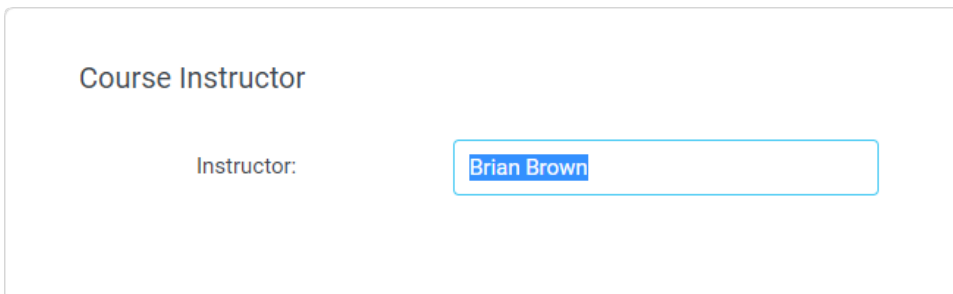

1. To do this, locate the course in the **Courses** section and left-click on it.

2. Then, open the **General** tab.

3. Scroll the page down to the **Course Instructor** section and erase the name in the **Instructor** field.

4. Click **Save**.

The screenshot shows the 'ispring learn' interface. At the top, there's a navigation bar with a home icon, a 'Back to Materials' link, and user profile icons. A sidebar on the left contains various course management icons. The main content area is titled 'Sales' with a subtitle 'Course'. Below this is a tabbed interface with 'General' selected. A message states: 'On this page, you can edit the information about your course.' A green 'Save' button is visible. The 'General' tab contains a form with a '\* Title:' field (containing 'Sales') and a 'Description:' field.

After the instructor is deleted from the course, the **Contact instructor** option on the course page will disappear.

**Important:**

1. If you deactivate a user assigned as an instructor, the option to ask an instructor will be gone.
2. If you reactivate the user who was earlier assigned as an instructor, the option to ask an instructor **won't** appear on the content page again.
3. If you delete the user assigned as an instructor, the option to ask an instructor will disappear and won't reappear even if this user registers in the system again.
