

# Branching

iSpring QuizMaker allows to control the order of questions in quizzes depending on students' answers.

To enable branching for a given question:

1. In the Questions pane, select a question you want to set branching for.
2. In the Feedback and Branching tab, choose the Branching type "**By Question**".
3. Specify what to do for each outcome of a given question (correct, incorrect, partial answered).

The screenshot shows the 'Feedback and Branching' tab in iSpring QuizMaker. The 'Feedback' dropdown is set to 'By Question'. The 'Branching' dropdown is also set to 'By Question' and is highlighted with a red circle. Below these, there are three rows for feedback and branching options: 'Correct' (Well done!), 'Incorrect' (Sorry, the answer is incorrect...), and 'Partial' (Partially correct). To the right, there are three dropdown menus for branching outcomes: '5. The interior angles of a triangle add up to ...°', '8. Type in the missing part of the formula this g...', and '7. In trigonometry this formula (y denotes the a...'. Each dropdown has a small arrow icon on its right side.

- **Next question** - a user will be shown the next question in a quiz.
- **Finish a quiz** - a given quiz will be finished, a user will be taken to the Results screen.
- **Specified question** - a user will be taken to a specified question.
- **Beginning of Group** - a user will be shown the first question of the group.
- **Random Pool** - a user will be shown the first question of the randomized group.

**Note:** If branching has been disabled in [Quiz Properties](#), you will be prompted to click a link to enable it right on the Feedback and Branching tab.

Enabling branching in your quiz will automatically disable the following options:

- Passing score in points
- Randomize questions order
- Show subset of random questions
- Allow users to finish without answering all questions
- Submit all at once

To disable branching for a question:

1. Select a question in the **Questions** pane.
2. On the toolbar in the Branching drop-down menu, choose "**Disabled**".

The screenshot shows the 'Feedback and Branching' tab in iSpring QuizMaker. The 'Feedback' dropdown is set to 'By Question'. The 'Branching' dropdown is set to 'Disabled' and is highlighted with a yellow background. Below these, there are three rows for feedback and branching options: 'Correct' (Well done!), 'Incorrect' (Sorry, the answer is incorrect...), and 'Partial' (Partially correct). To the right, there are three dropdown menus for branching outcomes: '3. The Statu', '2. Christopher Columbus Discovers America, 1492', and 'Next question'. Each dropdown has a small arrow icon on its right side.
